Excess of sources over applications	0
Excess of applications over sources	56,526

2 Technical characteristics of the Port

This chapter contains a physical description of the Port of Barcelona; its geographic location and climatic conditions, its land accesses, the location of lighthouses and beacons which facilitate maritime access, the distribution by use of the port's 828.9 ha of land (including the ZAL) and the draught along the more than 20 km of wharves. Finally, this chapter contains an inventory of the facilities and equipment in the Port.

INTRODUCTION

2.1. General conditions

2.1.1. Location

2.1.2. Wind pattern

2.1.3. Deep-water or theoretical storm pattern

2.1.4. Tides

2.1.5. Entrance

2.1.5.1. Access channel

2.1.5.1. bis Map of access channels and anchorage areas

2.1.5.2. Entrance mouth

2.1.5.3. Use of tugs for vessels entering and departing

2.1.5.4. Largest vessel entered in the last five years

2.1.6. Flotation areas (Ha)

2.1.6.1. Zone 1

2.1.6.2. Zone 2

2.2. Facilities for maritime trade

2.2.1. Wharves and berths

2.2.1.1. Classification by basin

2.2.1.2. Classification by use and draught

2.2.2. Land area and storage facility areas (m2)

2.2.3. Refrigerated warehouses and ice factories

2.2.4. Passenger terminals

2.2.5. Fishing facilities

2.2.6. Buildings and facilities for public use

2.4. Ships' facilities

2.4.1. Seawalls

2.4.1.1. Dry docks

2.4.1.2. Floating docks

2.4.2. Slipways

2.4.3. Shipyards

2.4.4. Ships' supply service

2.5. Dockside cargo-handling equipment

2.5.1. Cranes

2.5.1.1. Dock cranes

2.5.1.2. Mobile cranes

2.5.1.3. Number of cranes. Summary

2.5.2. Special loading and unloading facilities

2.5.3. Rolling stock

2.5.4. Auxiliary loading, discharge and transport equipment

2.6. Floating equipment

2.6.1. Dredgers

2.6.2. Tugboats

2.6.3. Sludge lighters, lighters and barges

2.6.4. Floating cranes

2.6.5. Other auxiliary service equipment

2.7. Land accesses and communications

2.7.1. Land accesses and internal communications

2.7.2. Map of internal communications

2.7.3. Map of land accesses

2.8. Brief description of facilities for specific traffic types

2.9. General map of lights and beacons

2.10. General map of Port

2 Technical characteristics of the Port

2.1. General conditions

2.1.1. Location

Longitude	2° 10' E
Latitude	41° 21' N

2.1.2. Wind pattern

Prevailing	3rd Quadrant
Dominant	1st. Quadrant

2.1.3. Deep-water or theoretical storm pattern

Length	300'
Maximum wave height (2h = Hs)	5
Maximum wave length (2L)	207
Significant wave	2,5

2.1.4. Tides

Maximum tidal range	125 cm
Height of LLW with respect to port zero mark	-5 cm
Height of HHW with respect to port zero mark	120 cm

2.1.5. Entrance

2.1.5.1. Access channel

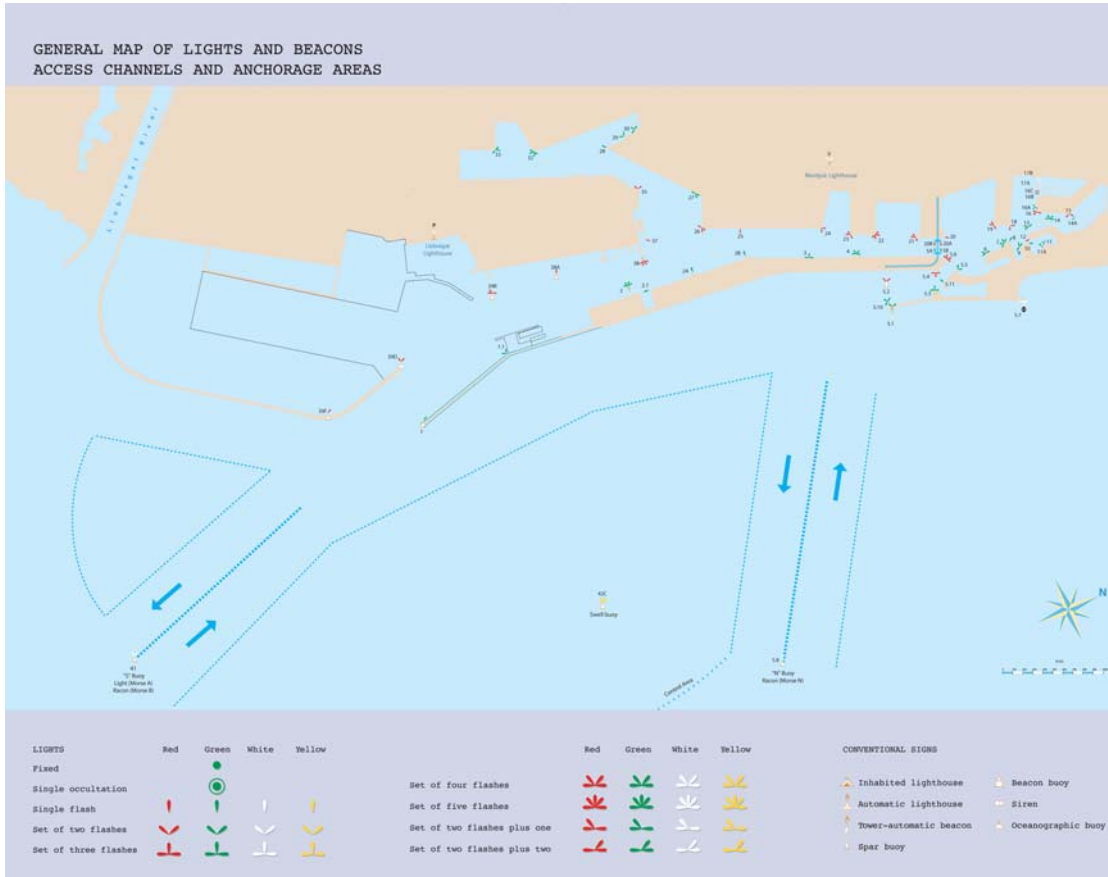

North entrance channel

Position	125° / 305° v
Width	0.5'
Longitude	1.5'
Water depth in LLW	30 m
Sea bottom characteristics	mud

South entrance channel

Position	166° / 346° v
Width	from 0.5' to 0.6'
Longitude	1.2'
Water depth in LLW	50 m
Sea bottom characteristics	mud

2.1.5.1. bis Map of access chanel and anchorage areas

2.1.5.2. Entrance mouth

North entrance mouth	
Position	015° / 195° v
Width	0.2'
Water depth in LLW	11.50 m
Maximum recorded current	1 cm/sec

South entrance mouth (works underway)	
Position	166° / 346° v
Width	0.28'
Water depth in LLW	18.5 m
Maximum recorded current	8 cm/sec

NB: The enlargement of the port of Barcelona to the south has created a channel between the current South entrance mouth and the access channel marked with beacons to indicate the navigable waters delimiting the filling works for the port's future breakwaters.

2.1.5.3. Use of tugs for vessels entering and departing

2.1.5. Entrances

2.1.5.4. Largest vessel entered in the last five years

Characteristics	Greatest length		Greatest depth at water level	
	Zone 1	Zone 2	Zone 1	Zone 2
Name	Arnold Maersk	Gaselys	CSC Long Beach	LNG Bayelsa
Nationality	Denmark	France	Hong Kong	Bermuda

2.7. Land accesses and communications

2.7.1. Land accesses and internal communications

Internal communications

Road

A 13km. long ring road connects the different wharves and storage areas around the perimeter of the Port of Barcelona. This road has two lanes in each direction around most of its length.

Apart from the peripheral ring network there are also access and service lanes to each wharf, but they are secondary to the main ring road described above.

Railway

Internal rail communications. From the Ponent wharf to the south, all the wharves have rail access, either with Renfe gauge (1.668 m), or with the gauge of the Ferrocarrils de la Generalitat de Catalunya (1m) or a mixed variety.

The Port's rail network is 33.475 km long, 15.45 km of which are Iberian gauge, 5 km of the gauge employed by the Ferrocarrils de la Generalitat de Catalunya and 4.700 km of mixed gauge (Iberian-Ferrocarrils de la Generalitat de Catalunya) and 3.63 km of mixed gauge (Iberian-European).

Renfe serves many different types of traffic: containers, non-containerised general cargo, solid and liquid bulks.

The Ferrocarrils de la Generalitat serve the flow of potash that is embarked in Barcelona from the Contradic wharf.

The Sud wharf is equipped with a container rail terminal.

The automobile terminals each have their own rail terminal for cars.

The Príncep d'Espanya wharf has a public multipurpose rail terminal mainly dedicated to cars, metal products and containers.

Land accesses

Given that the ringroads that girth the city of Barcelona pass very close to the port, access to the road network is immediate.

The main roads are:

- The AP-2 motorway, which links up with the centre of the country, Aragon and the A-68 motorway to the north of Spain and the French border through Irun.
- The AP-7 motorway, which links up to the south with the east coast and centre of Spain and to the north, with the French border and the European motorway network.
- The AP9 motorway, which links to the AP-7 at the French border via la Jonquera.
- The C-32 motorway, which links up with the south and east of the country.
- The C-58 motorway running to Sabadell, Terrassa and Manresa, which links up to the Llobregat axis and through the Cadí tunnel to France via Puigcerdà and the Pimorent tunnel.
- The C-31 motorway, which links up with the N II main road to the French border.
- The N II, to the west, centre and north of the country.
- The N C-17, with the French border via Puigcerdà.
- The N 150, to Sabadell, Terrassa and Manresa.
- The N 340, which links up to the south and east of the country.

Railway

The following railways link the port and its surround area with the rest of the country:

Renfe (Iberian gauge)

- To Portbou via Mataró and Granollers
- To Puigcerdà (France)
- To the centre, west and the north of the country via: Manresa-Lleida, Sant Vicenç-Lleida, Tarragona-Saragossa
- To the west, south and East coast via: Tarragona-Valencia

Ferrocarrils de la Generalitat de Catalunya

- To Manresa, Súria and Berga (metric gauge)
- To Igualada (metric gauge)
- To Sabadell and Terrassa

2.7.2. Map of internal communications

2.7.3. Map of land accesses

2.8. Brief description of facilities for specific traffic types

Containers and general cargo terminals

Loading for external navigation

In the 24 Sud Wharf is the public container terminal, which is a concession granted to TCB, SL. It covers an area of 46.1 hectares and has two berthing lines, one on the north face 350 m long and with a 12 m draught and another on the east face 1,012 m long with a draught of between 14 and 16 m. This terminal has 9 container lifting cranes, 5 of which are of the post-panamax type.

On 29 Príncipe d'Espanya wharf, the Terminal Catalunya, SA firm holds the concession for a multi-purpose terminal covering an area of 35.1 hectares, a berthing line of 1,653 m and a draught of between 8.7 and 14 m. The terminal has 2 ro-ro ramps and an area of 22,145 m² of covered warehouses. Likewise, the company owns 8 container lifting cranes, all of the post-panamax type.

On 01 Adossat and 20 Ponent - 21 Costa wharves, there are two multipurpose terminals run by UTE Unió Term. Est. LLEVANT T.M. Alcludia and Terminal Port-Nou, SA, respectively. Together, these terminals occupy an area of 15 has, with a draught of up to 16 m and a berthing line of 2,150 m. All in all, they have 7 ro-ro ramps and a covered warehouse area of 19,442 m². The UTE has 3 container lifting cranes and Terminal Port-Nou, SA and has another on the southern part of the Ponent Wharf.

Cargo in coastal shipping mode

Estibadora de Ponent, SA has two areas on 26 Álvarez de la Campa and 27 Lepant wharves (berths No. 2 and 3) for handling containers. This facility has two authorised areas, of 53,180 m² and 48,405 m² respectively, with draughts of between 6.5 m and 11.8 m and a berthing line of 870 m with three Ro-ro berths. It also has 1 28 Tn gantry crane and 4 container lifting cranes of 33.5 to 41 Tn. Apart from coastal traffic, this terminal also handles exterior traffic starting and ending in North Africa.

On 19 Sant Bertran wharf Tramediterránea SA has an area under concession of 34,995 m² for handling ro-ro traffic.

Automobile terminals

On 30 Dàrsena Sud and 31 Dàrsena Interior wharves there are the two automobile terminals: Autoterminal, SA and Setram SA. These wharves have a berthing line of 850 m, with a maximum draught of 12 m and four ro-ro berths.

Autoterminal has an area under concession of 29.2 Ha, with 3 multi-storey car storage areas, which has allowed it to increase its storage capacity by 299,340 m². The terminal has a capacity of 44,400 vehicles, of which 21,500 correspond to covered places and the remaining 22,900 in the open air. The terminal also has a vehicle personalisation centre and a protection-removing tunnel.

Setram operates an area under concession of 8.7 Ha and has a multi-storey parking area, which it shares with Autoterminal. This has allowed it to increase its storage area by 88,700 m². The terminal has a capacity for 10,000 vehicles, of which 4,000 correspond to covered places.

Bulk grain and seed terminal

22B Contradic Est wharf is home to the Ergransa terminal, specialised in the reception of bulk grains and seeds. It has multicellular silos with a capacity for up to 170,000 Tn. At the terminal there is a pneumatic discharge operational capacity of 900 Tn/h

Terminals for milling soya beans

26B Álvarez de la Campa and 22B Contradic West wharves are home to Cargill España, SA and Bunge Ibérica, SA (formerly Moyresa), specialised in the traffic of soyabeans. They have milling plants with a capacity of 1,400,000 Tn.

Bulk cement reception and loading terminal

On 22C Contradic, 26B Álvarez de la Campa and 01 Adossat wharves are the cement terminals, Portcemen SA and CEMEX SA. These terminals have silos with a storage capacity of 104,800 Tn.

Potash loading terminal

On 22A Contradic Nord wharf we can find Tramer SA, a terminal dedicated to the loading of potash. It has a maximum storage capacity of 80,000 Tn and is equipped with two gantry cranes with a capacity of between 700 and 700 Tn/hour.

Terminals for the loading, unloading and storage of liquids and liquefied gases

The Port of Barcelona houses the following specialised terminals in this segment of transit: Enagas, SA (natural gas), Relisa (oils), Tepsa (chemicals and refined petroleum), Terquimsa (liquid chemicals), Decal (refined petroleum), Meroil (refined petroleum), Sadesa (oils), Loiret & Haëntjens Esp., SA (molasses) and CLH, SA (refined petroleum). These terminals are located on 32 Inflamables, 22 Contradic wharves and on stretch 4 of the port Ringroad (circumval·lació). They occupy an area of 61.5 has with an exclusive berthing line of 2,390 2.390 m and have a draught of up to 12 m. Total storage capacity is 2,232,000 m³.

Fruit terminal

20C Ponent wharf houses the Terminal Port Nou, SA fruit terminal. It has 5,556 m² of refrigerated warehouse space, with three independent temperature controls, simultaneous storage of up to 6,000 pallets, computerised bar code control system and a loading platform that can accommodate up to 150 lorries per day.

Coffee and cocoa terminal

On 11,000 Álvarez de la Campa wharf is the BIT SA terminal. It covers an area of 11,000 m² and has a storage capacity for coffee and cocoa of 14,000 Tn. The terminal is under duty-free control and is type-approved by the LIFFE (London International Financial Futures and Options Exchange), necessary for the delivery and auctioning of coffee.

Non-ferrous metals terminal

29 Príncep d'Espanya wharf is home to the Barcelona Metals, SA non-ferrous metals terminal, specialised in the handling, storage and distribution of metals and their alloys: aluminium, copper, nickel, lead, tin and zinc. The terminal has been type approved by the London Metals Exchange (LME).

Cold storage facility

19 Sant Bertran Wharf houses Interlogística del Frío. The terminal has a cold storage facility for storing perishable products on a site covering 7,973 m² with 75,000 m³ capacity cold stores. It also has a freezing tunnel and is type approved for intra-Community storage.

2.9. General map of ligths and beacons

2.10. General map of Port

3 Authorised private-sector construction works and activities

Although the land itself is owned by the public sector, most of this is leased out through a number of legal deeds to private companies, which render port services. This chapter first contains a list of all the spaces, organised by wharf, which were leased out to private companies before the onset of 2008, with specific details as to size, functional use, the date on which authorisation was granted and the levy paid to the Barcelona Port Authority.

Following that there is a list of all the construction works and activities authorised in 2008.

INTRODUCTION

3.1. Authorised before 2008 and currently in force

3.2. Authorised in 2008

3 Authorised private-sector construction works and activities

4 Traffic statistics

This chapter contains an extensive description of the traffic of the Port of Barcelona. These statistics show movements of passengers, number of ships that have entered the port - classified according to size, flag and type - and the goods traffic in 2008. Note that point 4.7 contains specific information on containerised traffic and point 4.8 provides a summary of all of the traffic in the Port of Barcelona.

INTRODUCTION

4.1. Passenger statistics

4.1.1. Passengers

4.1.1.1. Number of passengers

4.1.1.2. Number of passengers on regular lines. Ports of origin y destination

4.1.2. Passenger vehicles. Number of units

4.2. Ships

4.2.1. Merchant vessels

4.2.1.1. Distribution by tonnage

4.2.1.2. Distribution by flags

4.2.1.3. Distribution type of vessel

4.2.2. Warships

4.2.3. Fishing vessels

4.2.4. Pleasure craft

4.2.5. Vessels entered for breaking

4.2.6. Other craft

4.3. Cargo, in tonnes

4.3.1. Handled by wharves and service berths

4.3.2. Handled on private wharves and berths

4.3.3. Unloaded and loaded during the year

4.3.4. Total cargo by nationality of ports of origin and destination

4.3.5. Transshipped cargo

4.3.6. Roll-on / Roll-off traffic

4.3.6.1 Summary of roll-on/roll-off traffic

4.3.6.2 Units of roll-on/roll-off intermodal (UTI) transport

4.3.6.3 Units of vehicles in cargo regime

4.3.7. Classification of cargo

4.3.7.1 Classification by type

4.3.7.2 Classification by type and presentation

4.3.7.3 Classification of goods in transit by type

4.3.7.4 Classification of goods by NST-2000

4.4. Local or river traffic, in tonnes

4.5. Ship supplies

4.6. Fish catches

4.7. Container traffic

4.7.1. 20-foot containers

4.7.2. Containers over 20 foot

4.7.3. Total containers of 20 foot and over

- 4.7.4. Total containers of 20 foot and over in transit**
- 4.7.5. Total 20 foot equivalent containers (TEUS)**
- 4.7.6. 20 foot equivalent containers (TEUS) in transit**
- 4.7.7. Goods transported in containers classified by type, in tonnes**

4.8. General summary of maritime traffic

4.8.1. General table number 1

4.8.2. General table number 2 (Including local traffic, supplies and fishing)

4.8.3. General table number 3

4.9. Land traffic

4 Traffic statistics

4.1. Passenger statistics

4.1.1. Passengers

4.1.1.1. Number of passengers

5 Use of the Port

This chapter describes the activity at the Port of Barcelona during 2008 from a different perspective from that of the previous chapter. It offers data on the use of the many Port facilities, including the cargo loaded and unloaded on each wharf, the number of vessels entering dry dock and their tonnage, and the sum of the lengths of all vessels berthing at the Port in 2008.

INTRODUCTION

- 5.1. Use of wharves (t)**
- 5.2. Basins**
- 5.3. Pointed mooring**
- 5.4. Berths**
- 5.5. Area utilisation (t/day)**
- 5.6. Mechanical shore equipment.**
 - 5.6.1. Cranes**
- 5.7. Conveyor trucks**
- 5.8. Conveyor belts**
- 5.9. Mechanical shovels**
- 5.10. Railways shunting, locomotives**
- 5.11. Wagons**
- 5.12. Trucks**
- 5.13. Weighbridges**
- 5.14. Floating cranes**
- 5.15. Tugboats**
- 5.16. Slipways**
- 5.17. Description of terminals and wharfs**
- 5.18. Floating dock**
- 5.19. Barges**
- 5.20. Dry dock**

6 Construction works

This chapter includes the investments in construction works that were partially or completely executed in 2008 by the Barcelona Port Authority. A description of the main projects is included.

The enlargement works of the Port of Barcelona have been co-financed by the European Union Cohesion Fund

INTRODUCTION

6.1. Works in progress or completed during the year

6.2. Brief description of the most important works

Orden	PPE	APB	Title
1	PBN1A2004E001	OB-GP-M-0387/2001	<p>MODIFICATION OF THE BUILDING PROJECT FOR THE EXTENSION OF THE EAST SEAWALL</p> <p>The Port of Barcelona enlargement works will provide the port with sufficient capacity to attract new traffics and meet the demands of its surrounding economic and industrial environment. The enlargement of the East seawall is a fundamental part of this, as it will hold sheltered waters allowing the building of new wharves. The project involves building a sloping seawall 2000 m long, subsequent to prior dredging of 3m, made up of 50 Tn solid concrete blocks resting on successive layers of rockpile, with an emerging wall of reinforced concrete crowned at a height of +12.00</p>
2	PBN1A2010E001	OB-GP-P-0389/2001	<p>ENLARGEMENT OF THE SOUTH SEAWALL STRETCH 3</p> <p>The enlargement works involve building sheltering seawalls to generate protected water areas and regain land from the sea. This involves building a sloping breakwater with a total length of 1 126 m corresponding to the end of the South Seawall, in a curved structure, followed by a straight stretch and a hammer-shaped end perpendicular to it. It is made up of 40-Tn solid concrete blocks in its outer layer, resting on successive layers of rockpile with an emerging wall of solid concrete crowned at a height of +11.00.</p>

Orden	PPE	APB	Title
3	PBN1A2018E001	OB-GP-P-0463/2004	<p>MODIFICATION OF THE COASTAL CORRECTIVE MEASURES PHASE III D (CREATION OF WETLANDS)</p> <p>The Environmental Impact Declaration (EID) of the Port of Barcelona's Master Plan comprises the measures to be implemented to compensate and correct the environmental impact of the works. One such measure was the creation of a beach on the right shore of the new mouth of the River Llobregat, by dumping 3,500,000 m³ of sand. The inner area of the new beach, in the stretch between the start of the pier and the high water mound on the right shore of the new mouth of the River Llobregat, will be turned into a new wetland to compensate for the loss of the La Podrida lagoon. This wetland comes under its own dedicated project and will involve measures required to guarantee conservation of the natural and artificial ecosystems of the river's flood plain.</p> <p>The works involve creation of a wetland on the new beach generated by the Port of Barcelona, which also comes under the coastal corrective measures. The wetland is triangular and runs along the coast for 1,700 m, covering a total area of approximately 50 ha. The terrain will be modelled using microtopography, creating dune and lagoon systems and drainage channels. Grass, bushes and trees will be planted there to recreate different communities, planned according to the water conditions of the substrate of each area.</p>
4	PBN1A4024E001	OB-GP-P-0566/2007	<p>MODIFICATION OF THE MOVEMENT OF PRE-LOADED MATERIALS (ACTION 2). PRAT TERMINAL (PRE-LOADED MATERIALS PRAT WHARF. PHASE II)</p> <p>As a result of the collapse of part of the berthing line of the Prat wharf, Barcelona Port Authority's Management Board agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The aim of the project is to plan the pre-loading earthworks in the area of the spaces associated to the Prat wharf.</p>
5	PBN1A3032A001	OB-GP-P-0578/2007	<p>MODIFICATION OF THE INSTALLATION OF GEODRAINS ON THE PRAT WHARF</p> <p>The installation of geodrains under the Prat wharf is a vital prerequisite for guaranteeing the correct drainage and consolidation of the terraces under the Movement of Pre-loaded Materials - Phase II of the Prat wharf project.</p> <p>The operation, involving installing 1,200 Km of geodrains at an average depth of 15 m, is a precursor of the Movement of Pre-loaded Materials - Phase II to guarantee proper drainage and consolidation of the terraces.</p>
6	PBN1C9026E001	OB-GP-M-0599/2007	<p>MODIFICATION OF THE ENLARGEMENT OF THE BORDER INSPECTION POST (BIP) IN THE PORT OF BARCELONA</p> <p>The shortcomings of the current service, the start of Short Sea Shipping services and forecast delays in the entry into service of the new terminal suggest the advisability of changing or reshaping the current BIP. The work will not only improve the offices, but will also involve enlarging the operational area and the cold storage facilities.</p> <p>This project aims to extend the facilities of the BIP building located in the TCB leaseholding - specifically the shed on the Sud wharf - by building 793 m² of sloping roof and 200 m² of flat roof, with the corresponding facilities and services. Once work is complete, the BIP will have a final roof area of 2,060 m² and 345 m² of flat roof.</p>
7	PBN1A4049E001	OB-GP-M-0602/2007	<p>MODIFICATION OF THE TREATMENT OF THE EXTRADOS (GRAVEL COLUMNS). PRAT WHARF. PHASE II</p> <p>Part of the Prat Wharf Phase 1 was seriously damaged on the 1st of January 2007, when some 660 m of the wharf wall, comprising 16 caissons, slid into the docks. Some caissons slid further than others, and one travelled a total of 90 m.</p> <p>This also shifted most of the filling material, which was spread throughout the dock. Barcelona Port Authority immediately devised a three-point action plan, to implement the following measures simultaneously:</p> <ol style="list-style-type: none"> 1. Analyse the causes of the collapse. 2. Complete the parts of the project that remained standing, Phase II and Phase I (Caissons 1 to 9), as safely and quickly as possible. 3. Rebuild the part that had collapsed (caissons 10 to 25), as safely and quickly as possible. <p>Gravel columns have been added to guarantee that the filling material behind the riprap extrados of the caissons on Prat Wharf Phase II respects minimum resistance criteria.</p>
8	PBN1C9002E001	OB-GP-P-0371/2001	<p>PORT CONTROL TOWER</p> <p>A whole series of factors point to the advisability of setting up a port centre for traffic control and the coordination of vessel services. First of all, the increasingly complex nature of port traffic, due to continually increasing traffic or the opening of the second entrance mouth - which will provide two access channels to the port -, or the future enlargement works, which will significantly increase the length of the berthing lines and the water areas (area 1, anchorage areas, etc.).</p> <p>Secondly, the building currently occupied by the pilots is not in a sound state, which is further exacerbated by the second phase of the Adossat wharf enlargement and the new uses planned for this wharf, therefore the pilots have to be installed elsewhere.</p> <p>The works project involved building the Control and Watch Tower of the Port of Barcelona with an annex for the Pilots Corporation and seafarers and the construction of a parking area. The tower is 46 m tall with 7 storeys, of which only the top three have been fitted out for control and port navigation purposes. The annex has been designed with a concrete structure. The project includes the operational facilities required to run properly.</p>

Orden	PPE	APB	Title
9	PBN1A9066E001	OB-GP-P-0465/2004	<p>REBUILDING THE ALIGNMENT OF MODULE 1 OF THE ADOSSAT WHARF</p> <p>Now that the Adossat wharf is being used for cruiser traffic, a ro-ro needs to be removed to provide a uniform structure right along the wharf, enabling it to work efficiently. This involves demolishing the ro-ro superstructure, extracting the surrounding rockpile, refloating the two caissons that make it up and mooring them in the port precinct.</p>
10	PBN1A3020E001	OB-GP-P-0517/2005	<p>BERTH FOR LIQUID BULK CARRIERS</p> <p>The APB has decided to build a new berth for liquid bulk carriers due to the increase in the amount of bulk liquids handled in the Port and the future forecasts for such traffic. The berth will be built on the Eastern face of the current bulk liquids terminal opposite the Port of Barcelona's future South entrance mouth. It will consist of reinforced concrete caissons, and will have a draught of 14 m.</p>
11	PBN1A9008E001	OB-GP-P-0520/2005	<p>ADDITIONAL WORKS TO THE 2ND MODIFICATION OF THE REDEVELOPMENT PROJECT OF THE MONTJUÏC LIGHTHOUSE</p> <p>The aim of this works project is to build a road connecting the Montjuïc Lighthouse to the urban road network. This road will be designed to allow car and coach traffic in both directions. It must therefore have two lanes 3.5 metres wide and plans should be studied for the inclusion of a hard shoulder with a pavement to enable pedestrian access. The maximum desirable slope of the stretch of road is calculated at 12%. Nonetheless, a gradient of up to 14% will be allowed in certain specific stretches. The Montjuïc Lighthouse redevelopment project has now been completed. This project involved restructuring and refurbishing this building to adapt it to new operational needs.</p> <p>Another facet of the Montjuïc Lighthouse redevelopment project was the need to improve accessibility, bearing in mind that the current access road is steep and winding, and also crosses a railway line at a level crossing with no barrier.</p>
12	PBN1B2052E001	OB-GP-P-0534/2006	<p>CONTROL TOWER CAR PARK</p> <p>A car park, and the attendant urban development, needs to be built to provide the Port Control Tower and its adjoining building with sufficient parking space and make it more accessible within the port area. This project will involve: building a covered parking area for 38 vehicles, each parking space measuring 2.5 m x 5 m, with a metal sheet roof, and developing the remaining 2,925 m² of the surrounding area by tarmacking the internal roads, providing basic landscaping for the remaining area, laying drains and installing street lighting.</p>
13	PBN1B2001C001	OB-GP-P-0537/2006	<p>FILLING, TERRACING AND PRE-LOADING MATERIAL TO CONSOLIDATE THE FILLING OF THE COSTA WHARF</p> <p>A new wharf front is being built parallel to the current Costa wharf, comprising prefabricated reinforced concrete caissons, at the two ends touching the neighbouring Ponent Sud and Contradic Nord wharves. The structure consists of a submerged concrete wall. The work underway also includes the extrados of the wharf, built with a layer of granular material. This involves general filling to a height of +2 above the wharf created between the old and new Costa wharf line, to form a terrace. To shorten the filling time, it will be pre-loaded with earth up to a height of +6, which is estimated to take an average of four months. It also includes extending a spillway at the southernmost tip of the current wharf and an 800 mm diameter collector located halfway along the wharf. Mud will be removed while filling and pre-loading are underway and will be stored on terraces to dry out.</p>
14	PBN1B4017E001	OB-GP-P-0538/2006	<p>URBAN DEVELOPMENT OF TERMINAL A</p> <p>The increase in large cruise ship traffic and the construction of the new cruiser Terminal A in the Adossat wharf require work to adapt the existing infrastructure around the new Terminal A. The aim is to bring this terminal in line with the others in terms of space and urban finishings. The project involves developing approximately 300 m of the Adossat wharf between Terminal B and the heliport leaseholding next to the North entrance mouth. The development works, very similar to the quality of the work carried out on the Adossat cruiser wharves, involve building a central walkway and pavements, shelters in waiting areas and paving and fencing off the apron. It also includes digging ditches for services, drainage, lighting, tree-planting, irrigation network, benches and signposting.</p>
15	PBN1A3033E001	OB-GP-P-0550/2006	<p>FRONT APRON CONTRADIC WHARF - ERGRANSA</p> <p>The 240 m-long front apron of the Contradic wharf is made up of two different types of structures. An initial stretch of 114 m, touching on the Contradic Nord wharf, is built of concrete blocks, with a cyclopean concrete superstructure. The rest of the wharf, which is 126 m long, is made of reinforced concrete caissons. The purpose of this project is to define the works to reform the stretch of wharf made of concrete blocks, and to perform the appropriate actions to build the front apron of the Contradic wharf.</p>
16	PBN1A3028E001	OB-GP-P-0557/2006	<p>ENLARGEMENT OF THE SUD WHARF</p> <p>A new 600 m stretch of the Adossat wharf needs to be built as part of the reorganisation of the port's container terminals. The shipyards in the Port-City area need to be relocated, and the Sud wharf extended and widened. The Sud wharf needs to be extended and widened as part of the reorganisation of the port's container terminals. The construction project works around the operating requirements of the CLH jetty (Compañía Logística de Hidrocarburos), for which two berths will remain operative throughout the wharf construction works. These considerations have caused a significant increase in the investment required with regard to the original figures in the Plan currently in force.</p>

Orden	PPE	APB	Title
17	PBN1B4000E001	OB-GP-P-0562/2007	<p>URBAN DEVELOPMENT OF ÁLVAREZ DE LA CAMPA</p> <p>The reorganisation of the Port of Barcelona's container terminals to optimise space means, among other things, that the road accesses to the Álvarez de la Campa wharf need to be redeveloped.</p> <p>The project involves redeveloping the road accesses to the Álvarez de la Campa wharf, in particular a link with two 600-metre long parallel lanes, linked by a perpendicular road 150 m long. The project involves adapting the two existing roundabouts, and all of the roads that converge on them.</p>
18	PBN1A3031Z001	OB-GP-P-0563/2007	<p>INSTALLATION OF INSTRUMENTS IN THE CAISSONS OF THE PRAT WHARF</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The aim of this work is to fit instruments in each caisson and to check the caissons making up Prat Wharf Phase I to determine why the Prat wharf collapsed. This project requires immediate installation of technical equipment (cell chains) to provide real-time information.</p>
19	PBN1A4027Z001	OB-GP-P-0572/2007	<p>INSTALLATION OF GEODRAINS ON PRAT WHARF</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The installation of 1,200 km of geodrains at an average depth of 15 m is a precursor of the "Movement of Pre-loaded Materials - Phase II" to guarantee proper drainage and consolidation of the terraces.</p>
20	PBN1E2001E001	OB-GP-P-0581/2007	<p>ENLARGEMENT OF THE PRINCEP D'ESPANYA RAIL TERMINAL AND DEVELOPMENT OF A HARD SHOULDER ON STRETCH VI</p> <p>Operational needs require work to be performed under the "Enlargement of the Princep d'Espanya rail terminal", pursuant to the letter sent by the APB's Sub-Directorate General of Port Operations and Planning.</p> <p>The different works projects involve building three linear structures behind the Princep d'Espanya wharf.</p> <p>The first of these involves laying a new 800-metre stretch of mixed gauge rail track. The second will adapt a service road adjacent to a stretch of the current rail line required for vehicle loading and unloading operations. This 450-metre stretch of road runs between the "Autoterminal" and "Sal Costa" accesses.</p> <p>The third project involves building a 700-metre long lane for queues of waiting vehicles along Stretch VI, between the roundabout housing the logistics operator Depósitos, Almacenes and Manipulaciones para la Exportación, S.A. (DAMEX) and Gate 29.</p>
21	PBN1A4046E001	OB-GP-P-0582/2007	<p>DRAINAGE LAYER ON THE TERRACE OF PRAT WHARF PHASE II</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>One of the problems the APB encountered while attempting to firm up the terraces on the Prat wharf was access to the terraces themselves. This was due to the poor quality and moisture content of the dredged materials. This project will therefore involve bringing the necessary material to build a working terrace, over which geotextiles or other types of drainage materials can be placed, to provide access to the heavy plant required to build the terrace, vertical drains and pre-loading materials.</p>
22	PBN1A4047E001	OB-GP-P-0595/2007	<p>FITTING OUT OF OFFICES</p> <p>The transfer of APB staff to the World Trade Center Barcelona (WTCB) building requires work areas to be adapted.</p> <p>This involves fitting out offices for APB staff in the WTCB building.</p>
23	PBN1h9006E001	OB-GP-P-0596/2007	<p>SUPPLY OF GRANULAR MATERIAL FROM RECYCLED CONSTRUCTION WASTE</p> <p>After the collapse of the Prat wharf on the 1st of January 2007, the Port of Barcelona had to reschedule the building plans to be able to deliver the terminal as quickly as possible. One project to be completed quickly is the creation of a drainage layer on the terrace of the Prat wharf to provide access to heavy plant, enabling the vertical drains to be built and facilitating horizontal drainage during the consolidation process. One component required for the drainage layer is selected irregular granular material, which can be obtained from recycled building waste.</p> <p>The project therefore involves supplying granular material from recycled building waste for use in the various works projects on the Prat terminal.</p>
24	PBN1A3348E001	OB-GP-P-0598/2007	<p>REBUILDING THE PRAT WHARF</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>This project involves recovering and/or demolishing the caissons affected by the Prat wharf collapse and rebuilding the wharf.</p>

Orden	PPE	APB	Title
25	PBN1A3347G001	OB-GP-P-0600/2007	<p>ADDITIONAL WORKS ON THE SHEET PILE WHARF IN ÁLVAREZ DE LA CAMPA WHARF</p> <p>The works on the sheet pile wharf in Álvarez de la Campa wharf have now been completed. They involved building a wharf 458 m long with a 12 m draught, crowned at +2.50 and comprising a screen of AZ-50 type sheet piles.</p> <p>During the dredging operations, and throughout the project, large concrete blocks, chains and factory waste were found on the seabed. These materials were part of the old wharf, which was mostly built with Indian caissons, or had been caused by activities in the wharf itself.</p> <p>The concrete blocks and waste from the old wharf were extracted using a 130-tonne lattice girder crane, with dredging down to a draught of -14.70 m. in the access channel area.</p>
26	PBN1A4048E001	OB-GP-P-E601/2007	<p>TREATMENT OF THE EXTRADOS, REPLACEMENT OF FILLING AND DRAINAGE LAYER, PRAT WHARF. PHASE I</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The work will involve reducing the pressure on the extrados of the Prat Wharf Phase I not affected by the collapse. Filling material will be replaced with other materials with more appropriate geotechnical characteristics.</p>
27	PBN1G2359F001	OB-GP-P-0604/2008	<p>ENVIRONMENTAL CONTROL AND MONITORING OF THE VARIOUS WORKS AT THE PRAT WHARF TERMINAL</p> <p>This is a fundamental part of the environmental work in the Prat wharf terminal. The nature of this project is quite unusual, as a considerable amount of dredged material will be present on the worksite.</p> <p>The aim is to assist the works manager in providing environmental control during the works on the Prat wharf terminal that depend directly on Barcelona Port Authority, specifically the works to rebuild the Prat wharf and all work related to consolidating and preparing the wharf itself and/or the terraces and adjoining areas.</p>
28	PBN1G2360F001	OB-GP-P-0605/2008	<p>TECHNICAL ASSISTANCE SERVICES FOR THE WORKS MANAGER OF THE VARIOUS WORKS AT THE PRAT WHARF TERMINAL</p> <p>On the 28th of November 2007, Barcelona Port Authority Management Board awarded UTE FERROVIAL CYES the contract under the call for tenders negotiated for the "Rebuilding the Prat Wharf" project. The works include performing the project prior to the start of the works. The bidder was informed of the results of the tender on the 14th of December 2007.</p> <p>This project is a fundamental part of the work, particularly the environmental actions, to be performed on the Prat wharf terminal. This is the most important and unusual project, as a considerable amount of dredged material will be present on the worksite.</p> <p>The aim is to assist the works manager in providing environmental control during the works on the Prat wharf terminal, specifically the works to rebuild the Prat wharf and all work related to consolidating and preparing the wharf itself and/or the adjoining terraces and platforms.</p>
29	PBN1A4050E001	OB-GP-P-0606/2008	<p>MOVEMENT OF PRE-LOADED MATERIALS (ACTION 3) PRAT TERMINAL</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>This is the third part of the works required to achieve an appropriate degree of consolidation of the filling of the Prat wharf. The project covers only the laying of the pre-loaded earth, not removal of such materials. It also includes filling the manoeuvring area of caissons 11 and 12 of Phase II and strengthening the South containing wall with quarry ballast.</p>
30	PBN1A4051E001	OB-GP-P-0607/2008	<p>MOVEMENT OF PRE-LOADED MATERIALS (ACTION 4) PRAT TERMINAL</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The project defines the fourth action required to achieve an appropriate degree of consolidation of the filling of the Prat wharf. More particularly, it concerns the terrace corresponding to caissons 1 to 7 of Phase I. The project covers only the laying of the pre-loaded earth, not removal of such materials.</p>
31	PBN1A4051E001	OB-GP-P-0608/2008	<p>MOVEMENT OF PRE-LOADED MATERIALS (ACTION 5) PRAT TERMINAL</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>The project involves the fifth action required to achieve an appropriate degree of consolidation of the filling of the Prat wharf. It covers removal (loading, transport, tipping and spreading) of existing filling earth. The tipped and spread material will be stored in a special enclosed area in the southern part of the Prat terminal, and piled up to a height of between +6.50 and +10.00, depending on the results of prior calculations of the stability of the embankments and the situation of the filling material to hold it stable.</p>

Orden	PPE	APB	Title
32	PBN1A2042E001	OB-GP-P-0577/2007	<p>GEOTECHNICAL SURVEYING PROGRAMME ON THE ADOSSAT WHARF AND ENLARGEMENT SUD WHARF</p> <p>The Port of Barcelona's Master Plan is part of the Delta Plan, which covers a range of spatial actions including the construction of the East and South seawalls. Two of the actions included under the Master Plan are the construction of a wharf attached to the East seawall, and the extension of the Sud wharf. A new 600 m stretch of this attached wharf needs to be built as part of the reorganisation of the port's container terminals. The shipyards in the Port-City area need to be relocated, and the Sud wharf extended and widened.</p> <p>Barcelona Port Authority has planned a geotechnical surveying programme, which is a necessary part of the drafting of the various projects that will make it possible to correctly scale the foundations of the containment works (wharves) and the stability of the filling materials.</p> <p>The work involves an exhaustive survey of the geotechnical characteristics of the subsoil in the Adossat and Sud wharves to plan the new wharves and install the future synthesis shipyard. The works are structured in several phases:</p> <ol style="list-style-type: none"> 1.- Design, planning and control of the geotechnical surveying work (field and laboratory tests). 2.- Geotechnical study of soil characterisation, with a scope similar to that contained in this document. 3.- Interpretation of results. 4.- Coordination work. 5.- Drafting of partial and final technical reports of the work. 6.- Preparation of an interactive GIS. 7.- Storage and custody of the core samples obtained.
33	PBN1A4054E001	OB-GP-P-0610/2008	<p>TERRACE IN THE REAR AREA OF THE PRAT TERMINAL</p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>This project will adapt the rear area of the Prat terminal to generate a category E-2 terrace (following the criterion of the Maritime Works Recommendations)</p>
34	PBN1A3033E002	OB-GP-P-0626/2008	<p>SUPPLYING OF 310 PROFILE UNITS</p> <p>The call for tenders to execute the project "Redevelopment of the front apron of the Contradic wharf" has failed to be awarded on two occasions. The first time, it was caused by the sharp rise in the price of steel between the drafting and tender phases, and the second time because the required sheet piles could not be found in time to comply with the project. In view of the urgent need to acquire the sheet piles to begin work as soon as possible, the contract has been awarded to the only company able to deliver the right material in time to perform the work.</p>
