## **2 Technical characteristics of the Port**

**This chapter contains a physical description of the Port of Barcelona; its geographic location and climatic conditions, its land accesses, the location of lighthouses and beacons which facilitate maritime access, the distribution by use of the port's 828.9 ha of land (including the ZAL) and the draught along the more than 20 km of wharves. Finally, this chapter contains an inventory of the facilities and equipment in the Port.**

## **INTRODUCTION**

### **2.1. General conditions**

#### **2.1.1. Location**

#### **2.1.2. Wind pattern**

#### **2.1.3. Deep-water or theoretical storm pattern**

#### **2.1.4. Tides**

#### **2.1.5. Entrance**

##### **2.1.5.1. Access channel**

##### **2.1.5.1. bis Map of access channels and anchorage areas**

##### **2.1.5.2. Entrance mouth**

##### **2.1.5.3. Use of tugs for vessels entering and departing**

##### **2.1.5.4. Largest vessel entered in the last five years**

#### **2.1.6. Flotation areas (Ha)**

##### **2.1.6.1. Zone 1**

##### **2.1.6.2. Zone 2**

### **2.2. Facilities for maritime trade**

#### **2.2.1. Wharves and berths**

##### **2.2.1.1. Classification by basin**

##### **2.2.1.2. Classification by use and draught**

#### **2.2.2. Land area and storage facility areas (m2)**

#### **2.2.3. Refrigerated warehouses and ice factories**

#### **2.2.4. Passenger terminals**

#### **2.2.5. Fishing facilities**

#### **2.2.6. Buildings and facilities for public use**

### **2.4. Ships' facilities**

#### **2.4.1. Seawalls**

##### **2.4.1.1. Dry docks**

##### **2.4.1.2. Floating docks**

#### **2.4.2. Slipways**

#### **2.4.3. Shipyards**

#### **2.4.4. Ships' supply service**

### **2.5. Dockside cargo-handling equipment**

#### **2.5.1. Cranes**

##### **2.5.1.1. Dock cranes**

##### **2.5.1.2. Mobile cranes**

##### **2.5.1.3. Number of cranes. Summary**

#### **2.5.2. Special loading and unloading facilities**

#### **2.5.3. Rolling stock**

#### **2.5.4. Auxiliary loading, discharge and transport equipment**

**2.6. Floating equipment**

**2.6.1. Dredgers**

**2.6.2. Tugboats**

**2.6.3. Sludge lighters, lighters and barges**

**2.6.4. Floating cranes**

**2.6.5. Other auxiliary service equipment**

**2.7. Land accesses and communications**

**2.7.1. Land accesses and internal communications**

**2.7.2. Map of internal communications**

**2.7.3. Map of land accesses**

**2.8. Brief description of facilities for specific traffic types**

**2.9. General map of lights and beacons**

**2.10. General map of Port**

## 2 Technical characteristics of the Port

### 2.1. General conditions

#### 2.1.1. Location

Longitude	2° 10' E
Latitude	41° 21' N

#### 2.1.2. Wind pattern

Prevailing	3rd Quadrant
Dominant	1st. Quadrant

#### 2.1.3. Deep-water or theoretical storm pattern

Length	300'
Maximum wave height (2h = Hs)	5
Maximum wave length (2L)	207
Significant wave	2,5

#### 2.1.4. Tides

Maximum tidal range	125 cm
Height of LLW with respect to port zero mark	-5 cm
Height of HHW with respect to port zero mark	120 cm

#### 2.1.5. Entrance

##### 2.1.5.1. Access channel

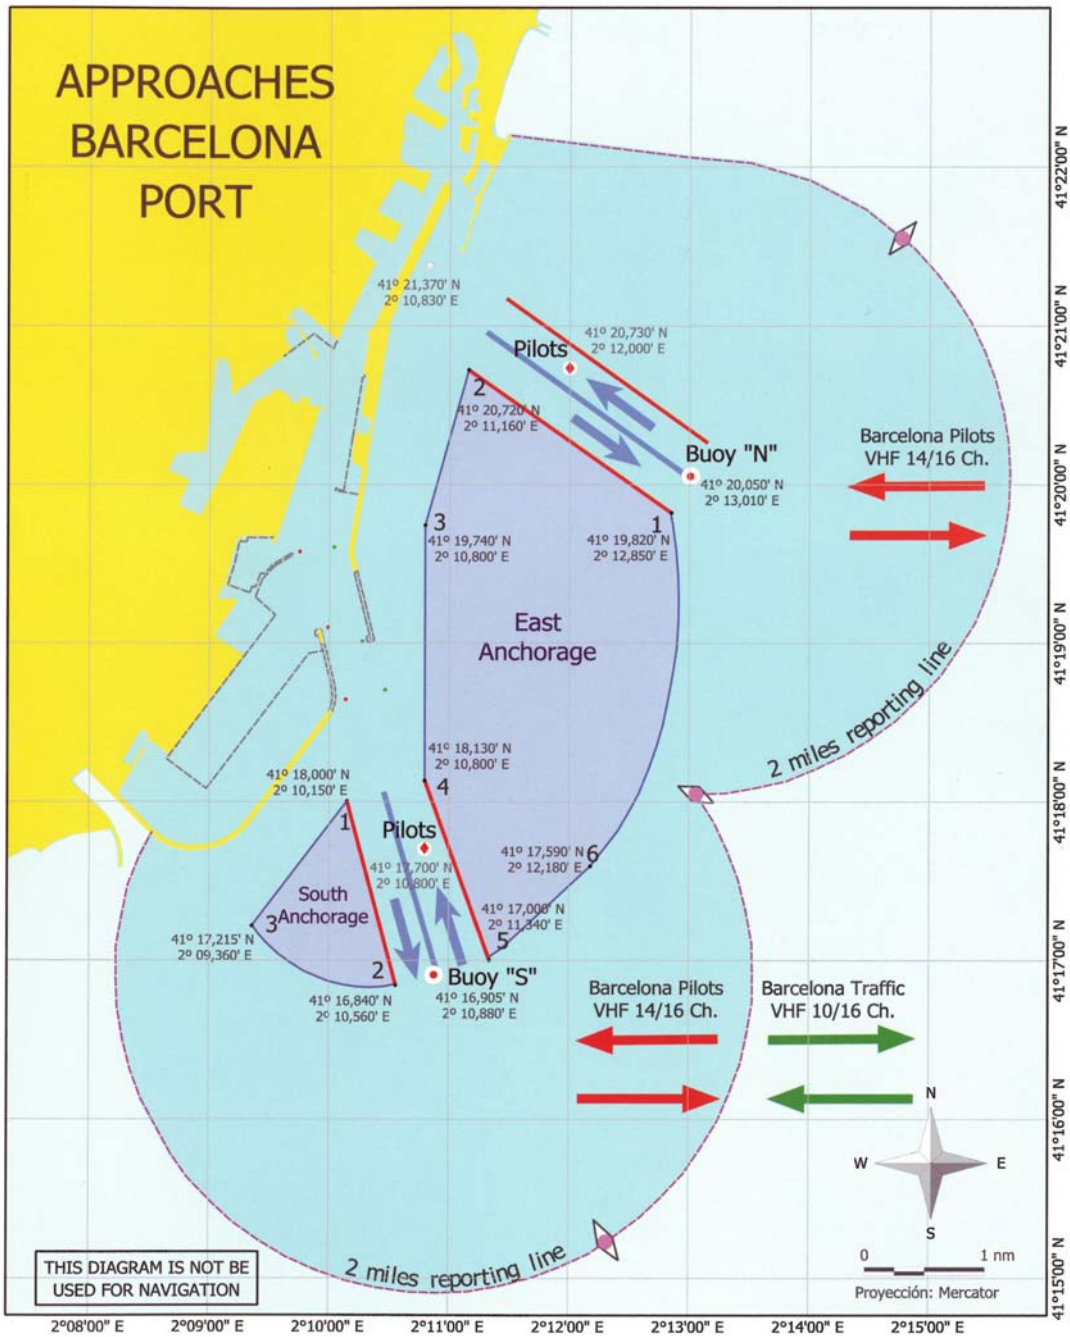

###### North entrance channel

Position	125° / 305° v
Width	926 m
Longitude	2.778 m
Water depth in LLW	30 m
Sea bottom characteristics	mud

###### South entrance channel

Position	166° / 346° v
Width	from 926 to 1.111 m
Longitude	2.222 m
Water depth in LLW	50 m
Sea bottom characteristics	mud

2.1.5.1. bis Map of access chanel and anchorage areas

### 2.1.5.2. Entrance mouth

North entrance mouth	
Position	015° / 195° v
Width	278 m
Water depth in LLW	11.50 m
Maximum recorded current	1 cm/sec

South entrance mouth (works underway)	
Position	166° / 346° v
Width	525 m
Water depth in LLW	18.5 m
Maximum recorded current	8 cm/sec

### 2.1.5.3. Use of tugs for vessels entering and departing

## 2.1.5. Entrances

### 2.1.5.4. Largest vessel entered in the last five years

Characteristics	Greatest length		Greatest depth at water level	
	Zone 1	Zone 2	Zone 1	Zone 2
Name	Mette Maersk	Boreal	Xin Hongkong	Omega Duke
Nationality	Dinamarca	Libèria	Hong Kong	Illes Marshall
GT	98.268	38.938	108.069	29.130
TPM	115.993	74.181	111.889	46.000
Length	371,00	224,89	336.7	183,00
Depth at Water level	15.5	13,95	14.5	12.2
Type	Container ship	Bulk carrier	Container ship	Tanker
Incoming or outgoing real draught	12,00	11,00	14.3	11,45

### 2.1.6. Flotation areas (ha)

#### 2.1.6.1. Zone 1

LOCATION	Outer harbour	Basins			Total (ha)
		Commercial	Fishing	Rest	
Inner port (between entrance mouth beacons)	-	331.30	3.68	603.32	938.30

## 2.1.6.2. Zone 2

Location	Accesses	Anchorage	Rest	Total (ha)
Limit of the port service	492.24	1,604.71	2,444.35	4,541.30

## 2.2. Facilities for maritime trade

### 2.2.1. Wharves and berths

#### 2.2.1.1. Classification by basin

Name	Length (lm)	Draught (m)	Width (m)	Uses
<b>Service</b>

## 2.7. Land accesses and communications

### 2.7.1. Land accesses and internal communications

#### Internal communications

##### Road

A 13 km-long ring road connects the different wharves and warehousing areas right around the perimeter of the Port of Barcelona. This road has two lanes in each direction along most of its length.

Apart from the outlying network, there are access and service roads to each wharf, which are secondary to the main road described above.

##### Railway

Inland railway communications: From the Ponent wharf towards the south, all wharves have rail access with either Iberian (1.668 m), metric (1m) or mixed gauges.

The Port de Barcelona's services area currently has three Iberian gauge rail accesses, and one metric gauge line (operated by Ferrocarrils de la Generalitat de Catalunya). The Port of Barcelona's internal rail network is 25.125 km long and comprises 9.054 km of Iberian gauge, 4.543 km metric gauge, 5 km mixed Iberian / metric and 6.528 km mixed Iberian / International gauge.

The rail operators meet different traffic needs using Iberian gauge: containers, non-containerised general cargo, solids and liquid bulk and cars.

Ferrocarrils de la Generalitat transports potash to be loaded in Barcelona on the Contradic wharf and transports new cars from the SEAT factory in Martorell to the rail terminal of the Príncipe d'Espanya wharf.

At present there are six rail terminals within the Port services area with a total length of up to 650 m. All the Port de Barcelona's rail terminals have adjacent rail terminals.

Both the large container terminals at the Port de Barcelona (Sud and Príncipe d'Espanya wharves) have rail terminals for loading and unloading containers. In addition to containers, the rail terminal on Príncipe d'Espanya wharf handles steel products and cars.

#### Land accesses

The Port of Barcelona is located right next to a node of land transport infrastructures. This node comprises a network of railways and motorways connecting the port to its hinterland.

The Barcelona ring road, or 'Ronda', passes right next to the port, providing immediate access to the road network.

The main roads involved are:

- The AP-2 motorway linking the city to the centre of Catalonia, Aragon and the A-68 to the north of Spain and French border via Irún.
- The AP-7 Mediterranean motorway linking us to the south, eastern coast and centre of Spain and north to the French border and the European motorway network.
- The AP-9 motorway connecting to the AP-7 at La Jonquera on the French border.
- The C-32 motorway linking to the south and eastern coast.
- The C-58 motorway to Sabadell, Terrassa and Manresa, linking up to the Llobregat axis and through Cadí Tunnel with France via Puigcerdà and the Puymorens tunnel.
- The C-31 motorway linking to National Highway II up to the French border.
- National Highway II to the west, centre and north of the country.
- National Highway C-17 to the French border via Puigcerdà.
- National Highway 150, with Sabadell, Terrassa and Manresa.
- National Highway 340, linking to the south and eastern coast.

#### Railway

The railways joining the port and its environs with the rest of the country are:

Renfe (Iberian gauge)

- To Port-Bou (France) via Mataró and Granollers
- To Puigcerdà (France)
- To the centre, west and north of the country via: Manresa-Lleida, Sant Vicenç-Lleida, Tarragona-Zaragoza
- To the west, south and eastern coast of the country via: Tarragona-Valencia

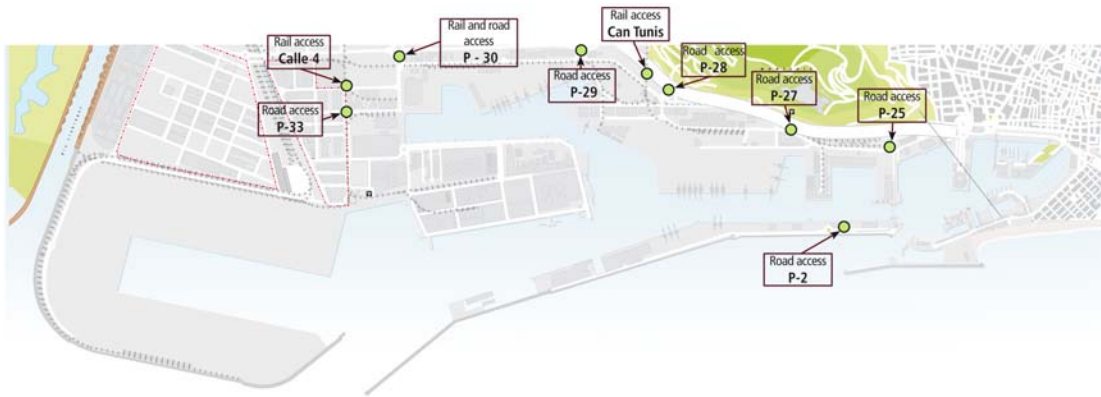

Ferrocarrils de la Generalitat de Catalunya

- To Manresa, Súria and Berga (metric gauge)
- To Igualada (metric gauge)
- To Sabadell and Terrassa

## 2.7.2. Map of internal communications

### 2.7.3. Map of land accesses

## 2.8. Brief description of facilities for specific traffic types

### Containers and general cargo terminals

#### Cargo in external shipping regime

The Public Container Terminal is located in 24 Sud wharf under a leaseholding granted to TCB, SL. It occupies an area of 46.1 ha. and has two berthing lines, one on the North face, 350 m long and 12 m deep, and the other on the South face, which is 1,012 m long with a draught of between 14 and 16 m. This terminal has 13 container ship cranes, 8 of which are post-panamax type.

On 29 Príncipe d'Espanya wharf, Terminal Catalunya, SA holds the lease for a multipurpose terminal covering an area of 33.9 ha., a berthing line of 1,096.4 m and a draught of between 8.7 and 14 m. The terminal has two ro-ro ramps and of 22,145 m<sup>2</sup> of covered warehouses. This terminal has 9 container ship cranes, all of which are of the post-panamax type.

There are two multipurpose terminals on 01 Adossat wharf, one operated by Estibadora de Ponent, SA and the other by Terminal Port-Nou, SA. These terminals occupy an area of 7.6 and 4.9 ha. respectively, with draughts of between 9.5 and 16 m, and berthing lines of 480 and 1,050 m. All in all, they have three ro-ro ramps and Terminal Port-Nou, SA has 9,000 m<sup>2</sup> of covered warehouses. On Adossat wharf, Estibadora de Ponent has four container ship cranes and Terminal Port-Nou, SA has two.

#### Cargo in coastal shipping regime (cabotage)

On 19 Sant Bertran and 20 Ponent wharves, Cia. Trasmediterránea has an area under lease of 10.9 ha. for passengers and vehicle traffic (ro-ro). In total, the terminal has 1,270 m. of berthing line, with draughts of between 7.8 and 11.2 m and 7 ro-ro ramps.

### Car terminals

The two car terminals - Autoterminal, SA and Setram SA - are located on 30 Dàrsena Sud and 31 Dàrsena Interior wharves. The berthing line of these wharves is 850 m, with a maximum draught of 12 m, and they have four ro-ro berths.

Autoterminal has an area under lease of 29.2 ha, with four multistorey lots, increasing the total storage area by 377,975 m<sup>2</sup>. The terminal has a capacity of 48,481 vehicles, of which 21,500 can be stored in the open air and the remaining 26,981 under cover. The terminal also has a vehicle personalisation centre and a cleaning and protection-removing tunnel.

Setram occupies a leaseholding area of 8.7 ha and has one multistorey car store, which it shares with Autoterminal, allowing it to increase its available area by 81,845 m<sup>2</sup> (4,934 places).

Setram also has part of a second multistorey car store, which it shares with Autoterminal, allowing it to increase its available area by 88,700 m<sup>2</sup>. The combination of the two multistorey car store provides the Setram terminal with a capacity of around 15,000 vehicles, approximately 9,000 of which are under cover.

### Bulk grain and seed terminal

22B Contradic Est wharf houses the Ergransa terminal, specialised in receiving bulk grain and seed. It has multi-cellular silos with a storage capacity of up to 170,000 t. This terminal has a practical pneumatic unloading capacity of 900 t/h.

### Soya bean milling terminals

26B Álvarez de la Campa and 23B Oest wharves are home to Cargill España, SA and Bunge Ibérica, SA (previously Moyresa), industries specialised in soya bean traffic. They have milling plants with a capacity of up to 1,400,000 t.

### Bulk cement receiving and dispatching terminals

22C Contradic and 01 Adossat wharves hold the Portcemen, SA, and Cemex España, SA, cement terminals respectively. These terminals have silos with a capacity of 104,800 t.

### Potash loading terminal

Tramer, SA is located on 22A Contradic Nord wharf and specialises in potash loading. It has a maximum storage capacity of 80,000 t and is equipped with a gantry crane able to load 700 t/hour.

### Terminals for unloading, loading and storing liquids and liquefied gas

The Port of Barcelona has the following terminals specialised in this segment of traffic: Enagás, SA (natural gas), Relisa (oils), Tepsa (chemicals and refined petroleum), Terquimsa (liquid chemicals), and Decal, Meroil and CLH, SA (refined petroleum). These terminals are located on 32 Inflammables wharf and on stretch IV of the Circumval·lació ring road. They occupy an area of 60 ha with a dedicated berthing line of 2,390 m and a draught of up to 12 m. Total storage capacity is 2,112,453 m<sup>3</sup>.

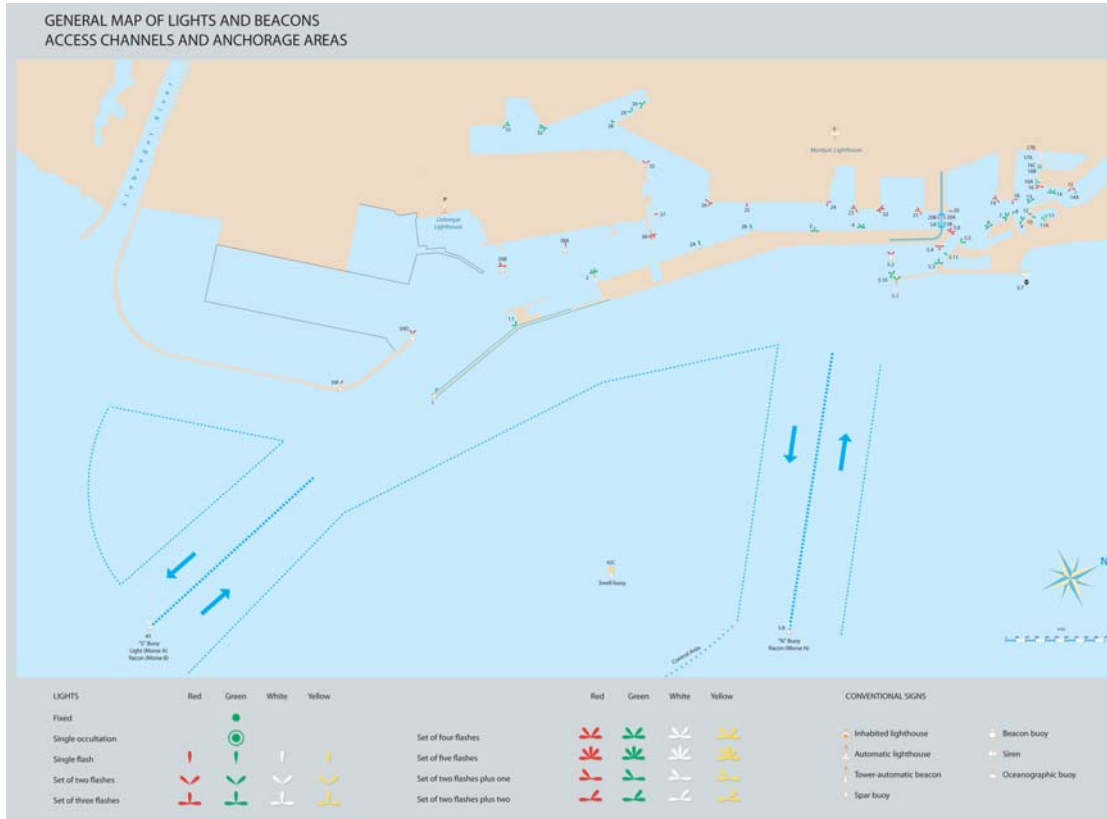

### Fruit terminal

20C Ponent wharf holds the Terminal Port Nou, SA fruit terminal. It has 5,556 m<sup>2</sup> of refrigerated warehouse space, with three independent temperature chambers and simultaneous storage of up to 6,000 pallets, a computerised bar code system and a loading platform for up to 150 trucks a day.

### Coffee and cocoa terminal

26 Álvarez de la Campa wharf holds the BIT, SA terminal. Covering an area of 11,000 m<sup>2</sup> and with the capacity to store 14,000 tonnes of coffee and cocoa, the terminal is under tax free regime and is type-approved by the LIFFE (London International Financial Futures and Options Exchange), which is required for coffee delivery and auctioning.

## 2.9. General map of lights and beacons

## 2.10. General map of Port

### **3 Authorised private-sector construction works and activities**

**Although the land itself is owned by the public sector, most of this is leased out through a number of legal deeds to private companies, which render port services. This chapter first contains a list of all the spaces, organised by wharf, which were leased out to private companies before the onset of 2009, with specific details as to size, functional use, the date on which authorisation was granted and the levy paid to the Barcelona Port Authority.**

**Following that there is a list of all the construction works and activities authorised in 2009.**

## **INTRODUCTION**

**3.1. Authorised before 2009 and currently in force**

**3.2. Authorised in 2009**

## 4 Traffic statistics

**This chapter contains an extensive description of the traffic of the Port of Barcelona. These statistics show movements of passengers, number of ships that have entered the port - classified according to size, flag and type - and the goods traffic in 2009. Note that point 4.7 contains specific information on containerised traffic and point 4.8 provides a summary of all of the traffic in the Port of Barcelona.**

## **INTRODUCTION**

### **4.1. Passenger statistics**

#### **4.1.1. Passengers**

##### **4.1.1.1. Number of passengers**

##### **4.1.1.2. Number of passengers on regular lines. Ports of origin y destination**

#### **4.1.2. Passenger vehicles. Number of units**

### **4.2. Ships**

#### **4.2.1. Merchant vessels**

##### **4.2.1.1. Distribution by tonnage**

##### **4.2.1.2. Distribution by flags**

##### **4.2.1.3. Distribution type of vessel**

#### **4.2.2. Warships**

#### **4.2.3. Fishing vessels**

#### **4.2.4. Pleasure craft**

#### **4.2.5. Vessels entered for breaking**

#### **4.2.6. Other craft**

### **4.3. Cargo, in tonnes**

#### **4.3.1. Handled by wharves and service berths**

#### **4.3.2. Handled on private wharves and berths**

#### **4.3.3. Unloaded and loaded during the year**

#### **4.3.4. Total cargo by nationality of ports of origin and destination**

#### **4.3.5. Transshipped cargo**

#### **4.3.6. Roll-on / Roll-off traffic**

##### **4.3.6.1 Summary of roll-on/roll-off traffic**

##### **4.3.6.2 Units of roll-on/roll-off intermodal (UTI) transport**

##### **4.3.6.3 Units of vehicles in cargo regime**

#### **4.3.7. Classification of cargo**

##### **4.3.7.1 Classification by type**

##### **4.3.7.2 Classification by type and presentation**

##### **4.3.7.3 Classification of goods in transit by type**

##### **4.3.7.4 Classification of goods by NST-2000**

### **4.4. Local or river traffic, in tonnes**

### **4.5. Ship supplies**

### **4.6. Fish catches**

### **4.7. Container traffic**

#### **4.7.1. 20-foot containers**

#### **4.7.2. Containers over 20 foot**

#### **4.7.3. Total containers of 20 foot and over**

- 4.7.4. Total containers of 20 foot and over in transit**
- 4.7.5. Total 20 foot equivalent containers (TEUS)**
- 4.7.6. 20 foot equivalent containers (TEUS) in transit**
- 4.7.7. Goods transported in containers classified by type, in tonnes**

**4.8. General summary of maritime traffic**

**4.8.1. General table number 1**

**4.8.2. General table number 2 (Including local traffic, supplies and fishing)**

**4.8.3. General table number 3**

**4.9. Land traffic**

## **5 Use of the Port**

**This chapter describes the activity at the Port of Barcelona during 2009 from a different perspective from that of the previous chapter. It offers data on the use of the many Port facilities, including the cargo loaded and unloaded on each wharf, the number of vessels entering dry dock and their tonnage, and the sum of the lengths of all vessels berthing at the Port in 2009.**

## **INTRODUCTION**

- 5.1. Use of wharves (t)**
- 5.2. Basins**
- 5.3. Pointed mooring**
- 5.4. Berths**
- 5.5. Area utilisation (t/day)**
- 5.6. Mechanical shore equipment.**
  - 5.6.1. Cranes**
- 5.7. Conveyor trucks**
- 5.8. Conveyor belts**
- 5.9. Mechanical shovels**
- 5.10. Railways shunting, locomotives**
- 5.11. Wagons**
- 5.12. Trucks**
- 5.13. Weighbridges**
- 5.14. Floating cranes**
- 5.15. Tugboats**
- 5.16. Slipways**
- 5.17. Description of terminals and wharfs**
- 5.18. Floating dock**
- 5.19. Barges**
- 5.20. Dry dock**

## 5 Use of the Port

## 6 Construction works

**This chapter includes the investments in construction works that were partially or completely executed in 2009 by the Barcelona Port Authority. A description of the main projects is included.**

*The enlargement works of the Port of Barcelona have been co-financed by the European Union Cohesion Fund*

## **INTRODUCTION**

**6.1. Works in progress or completed during the year**

**6.2. Brief description of the most important works**

## 6 Construction works

### 6.1. Works in progress or completed during the year

## 6.2. Brief description of the most important works

Order	PPEE	APB	Title
1	PBN1A9066E001	OB-GP-M-0465/2004	<p><b>REBUILDING THE ALIGNMENT OF MODULE 1 OF THE ADOSSAT WHARF</b></p> <p>The area south of the Adossat wharf houses the pilots dock and a ro-ro ramp serving the surrounding terraces. These 500 and 600 m long terraces allow only one large vessel to berth at any time, causing the loss of a large stretch of berthing line and land areas and reducing the efficiency of port operations.</p> <p>Around 45 m of the length of the current wharf need to be changed in order to provide this stretch with a single straight terrace. It will therefore be necessary to remove this ramp and to generate a new wharf to fill the pilots' dock. The new dock thus created will be approximately 1 200 m long and will allow the simultaneous berthing of cruisers and very long container vessels.</p> <p>This involves demolishing the ro-ro superstructure, extracting the surrounding rockpile, refloating the two caissons that make it up and mooring them in the port precinct.</p>
2	PBN1A3348E001	OB-GP-M-0598/2007	<p><b>REBUILDING THE PRAT WHARF</b></p> <p>After part of the Prat wharf collapsed during construction, Barcelona Port Authority's Management Board, meeting on the 31st of January 2007, agreed to execute a number of short-term actions under section two of the agreements reached by the Management Board, without prejudice to any other alternative or complementary actions or measures that may be planned.</p> <p>This project involves recovering and/or demolishing the caissons affected by the Prat wharf collapse and rebuilding the wharf.</p>

Order	PPEE	APB	Title
3	PBN1C9019E001	OB-GP-P-0417/2001	<p><b>BIP BUILDING</b></p> <p>The Border Inspection Posts have the necessary health guarantees for inspecting products for human and non-human consumption to determine whether they meet EU health conditions. They are located in the entry points for goods from outside the EU, such as ports, airports or geographical borders between the EU and third countries. The APB has a BIP on the Sud wharf - Terminal TCB, with facilities that came on stream in 1994. In order to adapt inspection capacity to food products to current and future goods traffic forecasts, the Port of Barcelona is planning a new building through this particular project.</p> <p>This new facility will offer certain unique features appropriate to the performance of physical and documentary checks on foodstuffs entering the peninsula by sea and coming onto the market for consumption.</p> <p>The site chosen for the development and location of the new BIP facility is plot 22 of the Logistics Activities Area (ZAL Prat). The purpose of this building project is to define works for developing the inside of the plot, the BIP module and lorry park to accommodate waiting vehicles.</p>
4	PBN1A3020E001	OB-GP-P-0517/2005	<p><b>BERTH FOR LIQUID BULK CARRIERS</b></p> <p>The APB has decided to build a new berth for liquid bulk carriers due to the increase in the amount of bulk liquids handled in the Port and the future forecasts for such traffic. This project will take shape on the northeast face of the Energy (Inflammables) wharf, a berthing area used for transferring refined products between ship and land. The terminal will service ships between 180 and 275 m long.</p> <p>The berth comprises three structures: an operations platform, two mooring structures (like pile moorings) and a land access. The mooring structure and the pile moorings comprise caissons identical to those used in Prat wharf, Phase II. Two walkways will allow people to walk between the operations platform and the mooring structures. The infrastructure works will be completed with the necessary equipment to allow ships to moor and berth.</p>
5	PBN1B2001C001	OB-GP-P-0537/2006	<p><b>FILLING, TERRACING AND PRE-LOADING MATERIAL TO CONSOLIDATE THE FILLING OF THE COSTA WHARF</b></p> <p>A new wharf front is being built parallel to the current Costa wharf, comprising prefabricated reinforced concrete caissons, at the two ends touching the neighbouring Ponent Sud and Contradic Nord wharves. The structure consists of a submerged concrete wall. The work underway also includes the extrados of the wharf, built with a layer of granular material. This involves general filling to a height of +2 above the wharf created between the old and new Costa wharf line, to form a terrace. To shorten the filling time, it will be pre-loaded with earth up to a height of +6, which is estimated to take an average of four months. It also includes extending a spillway at the southernmost tip of the current wharf and an 800 mm diameter collector located halfway along the wharf.</p> <p>Mud will be removed while filling and pre-loading are underway and will be stored on terraces to dry out.</p>
6	PBN1A4014E001	OB-GP-P-0546/2006	<p><b>ENLARGEMENT OF THE ADOSSAT WHARF PHASE 2 B</b></p> <p>The works for this project are part of the Port of Barcelona's Master Plan as part of the ongoing reorganisation of the container terminals.</p> <p>The project will involve building a wharf for a mixed container terminal with a berthing line 1,035 m long and 16 m deep attached to the east seawall. The solution adopted is a wharf made of caissons of reinforced concrete, building a ramp at the southernmost end of the wharf for berthing ro-ro ships and a containing wall perpendicular to the wharf alignment.</p>
7	PBN1A3033E001	OB-GP-P-0550/2006	<p><b>FRONT APRON CONTRADIC WHARF - ERGRANSA</b></p> <p>The front apron of the Contradic wharf is 240 m long and comprises two different types of concrete structures. An initial stretch of 114 m, touching on the Contradic Nord wharf, is built of concrete blocks, with a cyclopean concrete superstructure with large stone blocks inside. The rest of the wharf, which is 126 m long, is made of reinforced concrete caissons, used in combination with steel rods for greater strength.</p> <p>The purpose of this project is to define the works to reform the stretch of wharf made of concrete blocks, and to perform the appropriate actions to build the front apron of the Contradic wharf.</p>
8	PBN1A3028E001	OB-GP-P-0557/2006	<p><b>ENLARGEMENT OF THE SUD WHARF</b></p> <p>The Port of Barcelona's Sud wharf needs to be enlarged to increase the turning basin and ship manoeuvring area opposite the Enagas terminal. This means demolishing the CLH jetty (Compañía Logística de Hidrocarburos) to create a new berthing line. The works also affect the Terminal de Contenedores de Barcelona (TCB) and will strengthen its current wharf, allow larger container ships to enter the port and increasing container storage capacity from 1.3 to 2.1 Million TEU.</p> <p>This project involves building a 623 m berth and an 18 Ha terrace.</p> <p>El projecte consisteix en la construcció d'una atracada de 623 m i una esplanada de 18 ha.</p>

Order	PPEE	APB	Title
9	PBN1A1003E001	OB-GP-P-0568/2007	<p><b>FITTING OUT OF THE PRAT WHARF BERTHING LINE (SOUTH AREA)</b></p> <p>The Prat wharf terminal is currently under construction. Once completed, it will provide the wharf with a new 93-hectare terrace and a new berthing line 1,500 m long. This wharf will house a container terminal, with a handling capacity of 2.5 million units per year. The leaseholding company is TerCat, in which the Chinese group Hutchison Port Holding holds 70% and the Catalan Mestre group 30%. In addition to the intense import-export activity, particularly involving the railway, it will act as a hub port making it possible to concentrate and distribute containers to the ports in the foreland. This building project involves the 12 caissons from Phase II and the 13 caissons of Phase I, providing an approximate total length of 1,000 m.</p> <p>The wharf infrastructure has already been built, with the caissons sunk and the filling and consolidation of the terrace completed. Now that the infrastructure and pre-filling are completed, the superstructure or capping beam needs to be built to provide the necessary installations for mooring and berthing ships, and the elements for the future operation of the cranes and plant that will work in the terminal.</p>
10	PBN1A4047E001	OB-GP-P-0595/2007	<p><b>FITTING OUT OF OFFICES</b></p> <p>The transfer of APB staff to the World Trade Center Barcelona (WTCB) building involves the adaptation of work areas. This involves fitting out offices for APB staff in the WTCB building. Located in the Port Vell (Old Port) of the city, the WTCB is now firmly established as a major business centre in Barcelona.</p>
11	PBN1A4047E001	OB-GP-P-0596/2007	<p><b>SUPPLY OF GRANULAR MATERIAL FROM RECYCLED CONSTRUCTION WASTE</b></p> <p>The use of granular material obtained from recycled building waste is a viable alternative to traditional building methods. Recycling is an attractive alternative to using natural raw materials. The great advantage of this approach is that not only does it solve a waste disposal problem but also recovers waste materials, avoiding the need to use up natural raw materials. The granular material recycled from building rubble is used in the Port of Barcelona's enlargement programme.</p>
12	PBN1A3006F001	OB-GP-P-0603/2007	<p><b>SERVICES INVOLVING THE FITTING OF INSTRUMENTS AND MONITORING BEHAVIOUR OF THE PRAT TERMINAL PHASE II</b></p> <p>This involves managing the fitting of instruments to monitor the behaviour of the Prat Terminal Phase II. This comprises monitoring the movement of the caissons at the front of the terminal wharf and checking the settling of the pre-filled materials on the terrace area.</p>
13	PBN1G2359F001	OB-GP-P-0604/2008	<p><b>ENVIRONMENTAL CONTROL AND MONITORING OF THE VARIOUS WORKS ON THE PRAT WHARF TERMINAL</b></p> <p>This is a fundamental part of the environmental work in the Prat wharf terminal. The nature of this project is quite unusual, as a considerable amount of dredged material will be present on the work site. The aim is to assist the works manager in providing environmental control during the works on the Prat wharf terminal that depend directly on Barcelona Port Authority, specifically the works to rebuild the Prat wharf and all work related to consolidating and preparing the wharf itself and/or the terraces and adjoining areas.</p>
14	PBN1G2360F001	OB-GP-P-0605/2008	<p><b>TECHNICAL ASSISTANCE SERVICES FOR THE WORKS MANAGER OF THE VARIOUS WORKS AT THE PRAT WHARF TERMINAL</b></p> <p>The characteristics and volume of the work involved in rebuilding the Prat wharf necessitate on-site technical assistance and coordination of the work performed by the contractor. This contract covers technical assistance to the site manager of the various building works involved in the Prat wharf terminal, particularly as concerns rebuilding the Prat wharf and everything relating to the consolidation and fitting out of the wharf itself and/or the neighbouring terraces and platforms, to be built by the APB.</p>
15	PBN1A4052E001	OB-GP-P-0608/2008	<p><b>MOVEMENT OF PRE-LOADED MATERIALS (ACTION 5) PRAT TERMINAL</b></p> <p>The project involves the fifth action required to achieve an appropriate degree of consolidation of the filling of the Prat wharf. This project involves removal (loading, transport, tipping and spreading) of existing filling earth. It covers removal (loading, transport, tipping and spreading) of existing filling earth. The tipped and spread material will be stored in a special enclosed area in the southern part of the Prat terminal, and piled up to a height of +6.50 and possibly up to +10.00, depending on the results of prior calculations of the stability of the embankments and the situation of the filling material to hold it stable.</p>
16	PBN1AB9062E001	OB-GP-P-0624/2008	<p><b>FITTING OUT A WALKWAY TO PASSENGER TERMINAL "C"</b></p> <p>The work involves building a fixed walkway to Terminal C for passengers to embark and disembark and the module connecting the terminal and the walkway. This module is located in the area next to the southwestern facade of the terminal, in a rectangle comprising a walkway 21 m from this facade and its perpendicular 34 m from the corner with the northwest facade. This external area is currently used as a carpark. This walkway is located in the area next to the northwest facade of Terminal C within a rectangle 6.64 m. wide and 213.12 m. long. This area is currently used for loading and unloading operations on the wharf. The walkway is designed in such a way as to guarantee a harmonious visual continuity of the existing walkways already built by Creuers del Port de Barcelona in Terminals A and B.</p>

Order	PPEE	APB	Title
17	PBN1A9061E001	OB-GP-P-0628/2008	<p><b>EXTENSION OF THE LANE ON THE ADOSSAT WHARF</b></p> <p>Port Nou currently operates on the Adossat wharf. The current Phase I involves lanes used for loading and unloading operations with fixed cranes. However, Phase II has to use mobile cranes as there are no lanes. There are significant drawbacks to this mixed operation. Therefore, a feasibility study was carried out in January 2008 for a floating beam in the Adossat wharf to analyse the technical and economic viability of the proposed solution, involving extending the existing lanes in Phase I of the Adossat wharf. The study showed this solution to be feasible.</p> <p>This project provides a detailed definition of the solution chosen to resolve the temporary problem in the Adossat wharf.</p>
18	PBN1A3004E001	OB-GP-P-0630/2008	<p><b>SOUTHWARD ENLARGEMENT OF THE TERRACE. PRAT TERMINAL</b></p> <p>This project emerged as a result of the latest agreements reached between the APB and Terminal Catalunya, SA, in the process that ended with the modification of the leaseholding of the Prat Terminal, as approved in the APB Management Board meeting held on 17 December 2008. The total area of the terminal thus increased from 93 to 100 Ha. This additional space was achieved by enlarging the area under lease to the south of the Prat wharf. Specifically, the manoeuvring and storage area was extended by a 50 m strip and by 75 m in the area behind this.</p> <p>It is worth pointing out that the enlarged area for filling had already been regained from the sea as part of the hydraulic filling activity during previous works projects.</p> <p>The project involves covers removal (loading, transport, tipping and spreading) of the materials pre-loaded into the terrace corresponding to the southward extension of the Prat wharf.</p>
19	PBN1BA3005E001	OB-GP-P-0631/2008	<p><b>DEVELOPMENT OF "100" STREET</b></p> <p>The contractor is due to begin the Prat wharf operation at the end of 2010. Prior to this, new land accesses need to be built to the terminal and entry control points defined to restrict access to the port precinct. Likewise, the new terminal must be connected to the existing rail network in the Port of Barcelona using the International rail gauge.</p> <p>The absence of appropriately sized facilities could lead to serious congestion in and around the future container terminal on the Prat Wharf.</p> <p>This will involve building "100" Street to its final width of 36 m, from its intersection with "114" Street to the start of the ramps of the future southern intersection of the Prat lane, including connections with existing lanes and industrial areas.</p> <p>The project will also resolve interferences with existing installations, the definition of the new networks and sizing of the drainage network required for removing rain water from the respective road surfaces within this project area.</p>
20	PBN1A2044E001	OB-GP-P-0643/2009	<p><b>REINFORCING THE SEAWALL OF THE NORTH ENTRANCE MOUTH</b></p> <p>The Port of Barcelona's container terminals are being reorganised to optimise space within the port. Among other things, this involves resurfacing and developing road accesses to Alvarez de la Campa wharf.</p> <p>Adapting the stretch of the vertical seawall of the north entrance for use as a cruiser wharf during the summer months involves building a superstructure on top of the caissons to ensure that the wharf operates correctly and the seawall resists waves crashing on the emerging wall during winter storms.</p>
