## **2 Technical characteristics of the Port**

**This chapter contains a physical description of the Port of Barcelona; its geographic location and climatic conditions, its land accesses, the location of lighthouses and beacons which facilitate maritime access, the distribution by use of the port's 828.9 ha of land (including the ZAL) and the draught along the more than 20 km of wharves. Finally, this chapter contains an inventory of the facilities and equipment in the Port.**

## **INTRODUCTION**

### **2.1. General conditions**

#### **2.1.1. Location**

#### **2.1.2. Wind pattern**

#### **2.1.3. Deep-water or theoretical storm pattern**

#### **2.1.4. Tides**

#### **2.1.5. Entrance**

##### **2.1.5.1. Access channel**

##### **2.1.5.1. bis Map of access channels and anchorage areas**

##### **2.1.5.2. Entrance mouth**

##### **2.1.5.3. Use of tugs for vessels entering and departing**

##### **2.1.5.4. Largest vessel entered in the last five years**

#### **2.1.6. Flotation areas (Ha)**

##### **2.1.6.1. Zone 1**

##### **2.1.6.2. Zone 2**

### **2.2. Facilities for maritime trade**

#### **2.2.1. Wharves and berths**

##### **2.2.1.1. Classification by basin**

##### **2.2.1.2. Classification by use and draught**

#### **2.2.2. Land area and storage facility areas (m2)**

#### **2.2.3. Refrigerated warehouses and ice factories**

#### **2.2.4. Passenger terminals**

#### **2.2.5. Fishing facilities**

#### **2.2.6. Buildings and facilities for public use**

### **2.4. Ships' facilities**

#### **2.4.1. Seawalls**

##### **2.4.1.1. Dry docks**

##### **2.4.1.2. Floating docks**

#### **2.4.2. Slipways**

#### **2.4.3. Shipyards**

#### **2.4.4. Ships' supply service**

### **2.5. Dockside cargo-handling equipment**

#### **2.5.1. Cranes**

##### **2.5.1.1. Dock cranes**

##### **2.5.1.2. Mobile cranes**

##### **2.5.1.3. Number of cranes. Summary**

#### **2.5.2. Special loading and unloading facilities**

#### **2.5.3. Rolling stock**

#### **2.5.4. Auxiliary loading, discharge and transport equipment**

**2.6. Floating equipment**

**2.6.1. Dredgers**

**2.6.2. Tugboats**

**2.6.3. Sludge lighters, lighters and barges**

**2.6.4. Floating cranes**

**2.6.5. Other auxiliary service equipment**

**2.7. Land accesses and communications**

**2.7.1. Land accesses and internal communications**

**2.7.2. Map of internal communications**

**2.7.3. Map of land accesses**

**2.8. Brief description of facilities for specific traffic types**

**2.9. General map of lights and beacons**

**2.10. General map of Port**

## 2 Technical characteristics of the Port

### 2.1. General conditions

#### 2.1.1. Location

Longitude	2° 10' E
Latitude	41° 21' N

#### 2.1.2. Wind pattern

Prevailing	3rd Quadrant
Dominant	1st. Quadrant

#### 2.1.3. Deep-water or theoretical storm pattern

Length	300'
Maximum wave height (2h = Hs)	5
Maximum wave length (2L)	207
Significant wave	2,5

#### 2.1.4. Tides

Maximum tidal range	125 cm
Height of LLW with respect to port zero mark	-5 cm
Height of HHW with respect to port zero mark	120 cm

#### 2.1.5. Entrance

##### 2.1.5.1. Access channel

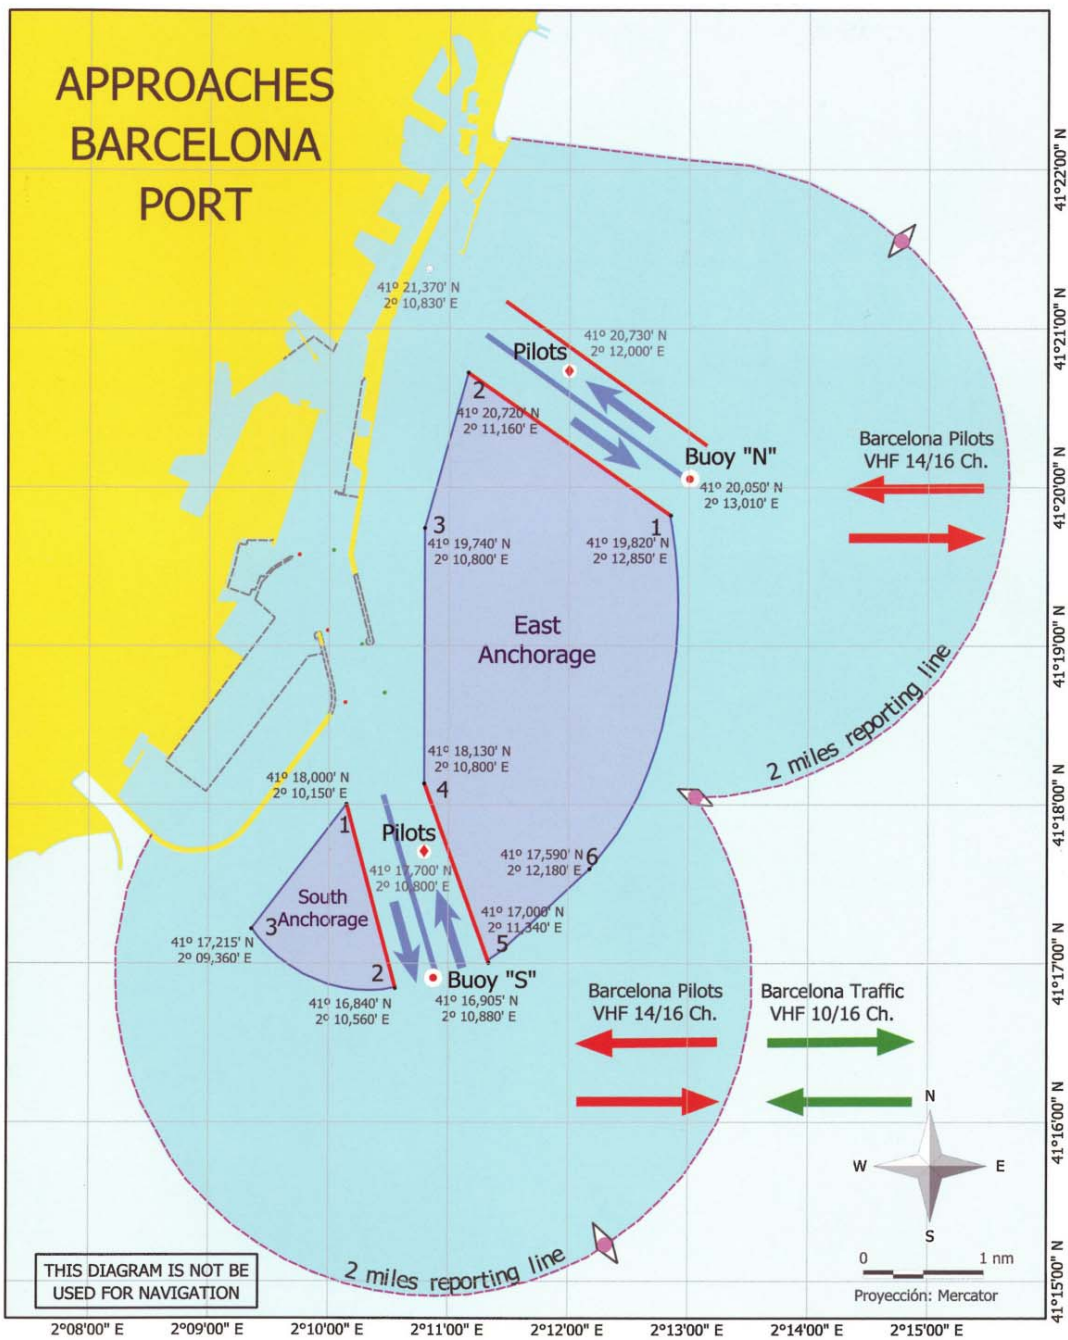

###### North entrance channel

Position	125° / 305° v
Width	926 m
Longitude	2.778 m
Water depth in LLW	30 m
Sea bottom characteristics	mud

###### South entrance channel

Position	166° / 346° v
Width	from 926 to 1.111 m
Longitude	2.222 m
Water depth in LLW	50 m
Sea bottom characteristics	mud

2.1.5.1. bis Map of access chanel and anchorage areas

### 2.1.5.2. Entrance mouth

North entrance mouth	
Position	015° / 195° v
Width	278 m
Water depth in LLW	11.50 m
Maximum recorded current	1 cm/sec
South entrance mouth (works underway)	
Position	166° / 346° v
Width	525 m
Water depth in LLW	18.5 m
Maximum recorded current	8 cm/sec

### 2.1.5.3. Use of tugs for vessels entering and departing

## 2.1.5. Entrances

### 2.1.5.4. Largest vessel entered in the last five years

Characteristics	Greatest length		Greatest depth at water level	
	Zone 1	Zone 2	Zone 1	Zone 2
Name	Mette Maersk	MSC Sandra	Maersk Altair	Castillo de Trujillo
Nationality	Dinamarca	Panamá	Singapur	España
GT	98.268	43.575	108.393	21.589
TPM	115.993	61.468	110.295	29.500
Length	371	273,70	337.6	182
Depth at Water level	15.5	13	15	11,4
Type	Container ship	Container ship	Container ship	Tanc
Incoming or outgoing real draught	12,00	8,00	14.70	11.40

### 2.1.6. Flotation areas (ha)

#### 2.1.6.1. Zone 1

LOCATION	Outer harbour	Basins			Total (ha)
		Commercial	Fishing	Rest	
Inner port (between entrance mouth beacons)	-	331.30	3.68	581.52	916.50

## 2.1.6.2. Zone 2

Location	Accesses	Anchorage	Rest	Total (ha)
Limit of the port service	492.24	1,604.71	2,444.35	4,541.30

## 2.2. Facilities for maritime trade

### 2.2.1. Wharves and berths

#### 2.2.1.1. Classification by basin

Name	Length (lm)	Draught (m)	Width (m)	Uses

## 2.7. Land accesses and communications

### 2.7.1. Land accesses and internal communications

#### Internal communications

##### Road

A 13 km-long ring road connects the different wharves and warehousing areas right around the perimeter of the Port of Barcelona. This road has two lanes in each direction along most of its length.

Apart from the outlying network, there are access and service roads to each wharf, which are secondary to the main road described above.

##### Railway

As regards inland railway communications, from the Ponent wharf towards the South, all the wharves have rail access, either with RENFE gauge (1.668 m), Ferrocarrils de la Generalitat gauge (1m) or mixed gauge.

The internal rail network of the Port of Barcelona is 29 km long. Of this total, 9.05 km are Iberian gauge, 4.543 km are metric gauge, 5 Km are mixed Iberian / metric, 8 km are mixed Iberian / International and 2.25 km are mixed Iberian-European / metric.

The rest are origin-destination lines.

RENFE provides service for a wide variety of traffic: containers, non-containerised general cargo, solid and liquid bulks.

Ferrocarrils de la Generalitat provides a service from the Contradic wharf for the potash loaded in Barcelona.

The Sud wharf has a rail terminal for containers.

The car terminals have their own rail terminal.

The Princep d'Espanya wharf has a public multi-purpose rail terminal mainly dedicated to cars, steel products and containers.

#### Land accesses

The Port of Barcelona is located right next to a node of land transport infrastructures. This node comprises a network of railways and motorways connecting the port to its hinterland.

The Barcelona ring road, or 'Ronda', passes right next to the port, providing immediate access to the road network.

The main roads involved are:

- The AP-2 motorway linking the city to the centre of Catalonia, Aragon and the A-68 to the north of Spain and French border via Irún.
- The AP-7 Mediterranean motorway linking us to the south, eastern coast and centre of Spain and north to the French border and the European motorway network.
- The AP-9 motorway connecting to the AP-7 at La Jonquera on the French border.
- The C-32 motorway linking to the south and eastern coast.
- The C-58 motorway to Sabadell, Terrassa and Manresa, linking up to the Llobregat axis and through Cadí Tunnel with France via Puigcerdà and the Puymorens tunnel.
- The C-31 motorway linking to National Highway II up to the French border.
- National Highway II to the west, centre and north of the country.
- National Highway C-17 to the French border via Puigcerdà.
- National Highway 150, with Sabadell, Terrassa and Manresa.
- National Highway 340, linking to the south and eastern coast.

#### Railway

The railways joining the port and its environs with the rest of the country are:

Renfe (Iberian gauge)

- To Port-Bou (France) via Mataró and Granollers
- To Puigcerdà (France)
- To the centre, west and north of the country via: Manresa-Lleida, Sant Vicenç-Lleida, Tarragona-Zaragoza
- To the west, south and eastern coast of the country via: Tarragona-Valencia

Ferrocarrils de la Generalitat de Catalunya

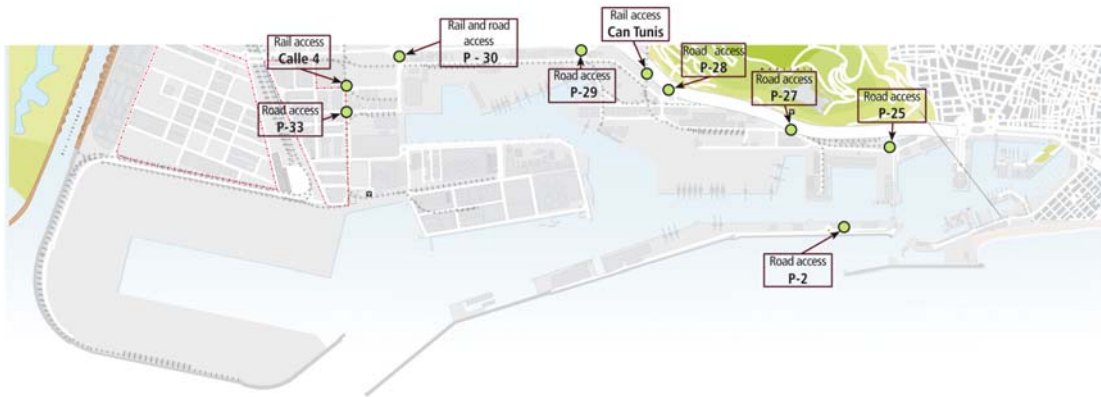

- To Manresa, Súria and Berga (metric gauge)
- To Igualada (metric gauge)
- To Sabadell and Terrassa

## 2.7.2. Map of internal communications

— Internal road net

### 2.7.3. Map of land accesses

## 2.8. Brief description of facilities for specific traffic types

### Containers and general cargo terminals

#### Cargo in external shipping regime

The Public Container Terminal is located in 24 Sud wharf under a leaseholding granted to TCB, SL. It occupies an area of 54.9 ha. and has two berthing lines, one on the North face, 350 m long and 12 m deep, and the other on the South face, which is 1,012 m long with a draught of between 14 and 16 m. This terminal has 14 container ship cranes, 8 of which are post-panamax type.

On 29 Príncep d'Espanya wharf, Terminal Catalunya, SA holds the lease for a multipurpose terminal covering an area of 33.9 ha., a berthing line of 1,653 m and a draught of between 8.7 and 14 m. The terminal has two ro-ro ramps and of 22,145 m<sup>2</sup> of covered warehouses. This terminal has 9 container ship cranes, all of which are of the post-panamax type.

They are one multipurpose terminals on 01 Adossat wharf, operated by Terminal Port-Nou, SA. These terminal occupy an area of 4.9 ha. with draughts of between 12 and 16 m, and berthing line of 480 and one ro-ro ramp. This terminal has two container ship cranes.

#### Cargo in coastal shipping regime (cabotage)

On 19 Sant Bertran and 20 Ponent wharves, Terminal Ferry de Barcelona (SRLU) society has an area under lease of 11.3 ha. for passengers and vehicle traffic (ro-ro). In total, the terminal has 1,270 m. of berthing line, with draughts of between 7.8 and 11.2 m and 7 ro-ro ramps.

#### Car terminals

The two car terminals - Autoterminal, SA and Setram SA - are located on 30 Dàrsena Sud and 31 Dàrsena Interior wharves. The berthing line of these wharves is 850 m, with a maximum draught of 12 m, and they have four ro-ro berths.

Autoterminal has an area under lease of 29.2 ha, with four multistorey lots, increasing the total storage area by 377,975 m<sup>2</sup>. The terminal has a capacity of 48,481 vehicles, of which 21,500 can be stored in the open air and the remaining 26,981 under cover. The terminal also has a vehicle personalisation centre and a cleaning and protection-removing tunnel.

Setram occupies a leaseholding area of 9.4 ha and has one multistorey car store, which it shares with Autoterminal, allowing it to increase its available area by 81,845 m<sup>2</sup> (4,934 places).

Setram also has part of a second multistorey car store, which it shares with Autoterminal, allowing it to increase its available area by 88,700 m<sup>2</sup>. The combination of the two multistorey car store provides the Setram terminal with a capacity of around 15,000 vehicles, approximately 9,000 of which are under cover.

#### Bulk grain and seed terminal

22B Contradic Est wharf houses the Ergransa terminal, specialised in receiving bulk grain and seed. It has multi-cellular silos with a storage capacity of up to 170,000 t. This terminal has a practical pneumatic unloading capacity of 900 t/h.

#### Soya bean milling terminals

26B Álvarez de la Campa and 23B Oest wharves are home to Cargill España, SA and Bunge Ibérica, SA (previously Moyresa), industries specialised in soya bean traffic. They have milling plants with a capacity of up to 1,400,000 t.

#### Bulk cement receiving and dispatching terminals

22C Contradic and 01 Adossat wharves hold the Portcemen, SA, and Cemex España, SA, cement terminals respectively. These terminals have silos with a capacity of 104,800 t.

#### Potash loading terminal

Tramer, SA is located on 22A Contradic Nord wharf and specialises in potash loading. It has a maximum storage capacity of 80,000 t and is equipped with a gantry crane able to load 700 t/hour.

#### Terminals for unloading, loading and storing liquids and liquefied gas

The Port of Barcelona has the following terminals specialised in this segment of traffic: Enagás, SA (natural gas), Relisa (oils), Tepsa (chemicals and refined petroleum), Terquimsa (liquid chemicals), and Decal, Meroil and CLH, SA (refined petroleum). These terminals are located on 32 Inflammables wharf and on stretch IV of the Circumval·lació ring road. They occupy an area of 86,66 ha with a dedicated berthing line of 2,390 m and a draught of up to 12 m. Total storage capacity for liquids is 2,166,954 m<sup>3</sup> and liquefied gas is 544,000 m<sup>3</sup>.

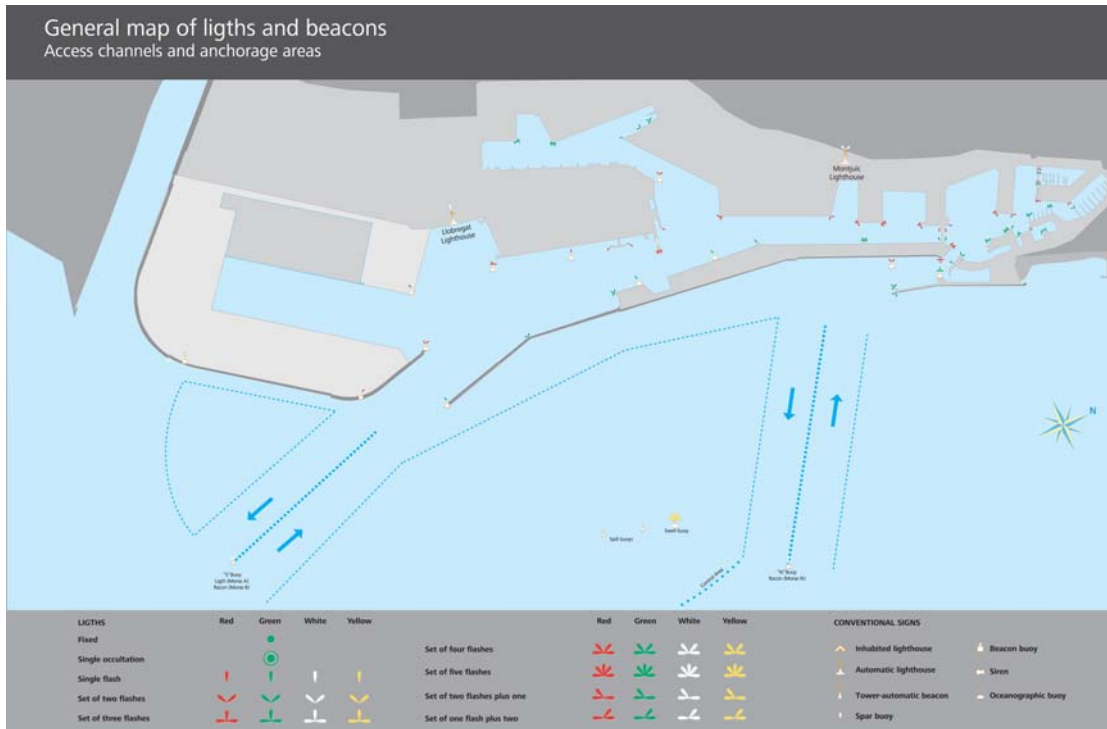

#### Fruit terminal

20C Ponent wharf holds the Terminal Port Nou, SA fruit terminal. It has 5,556 m<sup>2</sup> of refrigerated warehouse space, with three independent temperature chambers and simultaneous storage of up to 6,000 pallets, a computerised bar code system and a loading platform for up to 150 trucks a day.

#### Coffee and cocoa terminal

26 Álvarez de la Campa wharf holds the BIT, SA terminal. Covering an area of 11,000 m<sup>2</sup> and with the capacity to store 14,000 tonnes of coffee and cocoa, the terminal is under tax free regime and is type-approved by the LIFFE (London International Financial Futures and Options Exchange), which is required for coffee delivery and auctioning.

## 2.9. General map of ligths and beacons

## 2.10. General map of Port

### **3 Authorised private-sector construction works and activities**

**Although the land itself is owned by the public sector, most of this is leased out through a number of legal deeds to private companies, which render port services. This chapter first contains a list of all the spaces, organised by wharf, which were leased out to private companies before the onset of 2010, with specific details as to size, functional use, the date on which authorisation was granted and the levy paid to the Barcelona Port Authority.**

**Following that there is a list of all the construction works and activities authorised in 2010.**

## **INTRODUCTION**

**3.1. Authorised before 2010 and currently in force**

**3.2. Authorised in 2010**

### 3 Authorised private-sector construction works and activities

#### 3.1. Authorised before 2010 and currently in force

## 4 Traffic statistics

**This chapter contains an extensive description of the traffic of the Port of Barcelona. These statistics show movements of passengers, number of ships that have entered the port - classified according to size, flag and type - and the goods traffic in 2010. Note that point 4.7 contains specific information on containerised traffic and point 4.8 provides a summary of all of the traffic in the Port of Barcelona.**

## **INTRODUCTION**

### **4.1. Passenger statistics**

#### **4.1.1. Passengers**

##### **4.1.1.1. Number of passengers**

##### **4.1.1.2. Number of passengers on regular lines. Ports of origin y destination**

#### **4.1.2. Passenger vehicles. Number of units**

### **4.2. Ships**

#### **4.2.1. Merchant vessels**

##### **4.2.1.1. Distribution by tonnage**

##### **4.2.1.2. Distribution by flags**

##### **4.2.1.3. Distribution type of vessel**

#### **4.2.2. Warships**

#### **4.2.3. Fishing vessels**

#### **4.2.4. Pleasure craft**

#### **4.2.5. Vessels entered for breaking**

#### **4.2.6. Other craft**

### **4.3. Cargo, in tonnes**

#### **4.3.1. Handled by wharves and service berths**

#### **4.3.2. Handled on private wharves and berths**

#### **4.3.3. Unloaded and loaded during the year**

#### **4.3.4. Total cargo by nationality of ports of origin and destination**

#### **4.3.5. Transshipped cargo**

#### **4.3.6. Roll-on / Roll-off traffic**

##### **4.3.6.1 Summary of roll-on/roll-off traffic**

##### **4.3.6.2 Units of roll-on/roll-off intermodal (UTI) transport**

##### **4.3.6.3 Units of vehicles in cargo regime**

#### **4.3.7. Classification of cargo**

##### **4.3.7.1 Classification by type**

##### **4.3.7.2 Classification by type and presentation**

##### **4.3.7.3 Classification of goods in transit by type**

##### **4.3.7.4 Classification of goods by NST-2000**

### **4.4. Local or river traffic, in tonnes**

### **4.5. Ship supplies**

### **4.6. Fish catches**

### **4.7. Container traffic**

#### **4.7.1. 20-foot containers**

#### **4.7.2. Containers over 20 foot**

#### **4.7.3. Total containers of 20 foot and over**

- 4.7.4. Total containers of 20 foot and over in transit**
- 4.7.5. Total 20 foot equivalent containers (TEUS)**
- 4.7.6. 20 foot equivalent containers (TEUS) in transit**
- 4.7.7. Goods transported in containers classified by type, in tonnes**

**4.8. General summary of maritime traffic**

**4.8.1. General table number 1**

**4.8.2. General table number 2 (Including local traffic, supplies and fishing)**

**4.8.3. General table number 3**

**4.9. Land traffic**

## **5 Use of the Port**

**This chapter describes the activity at the Port of Barcelona during 2010 from a different perspective from that of the previous chapter. It offers data on the use of the many Port facilities, including the cargo loaded and unloaded on each wharf, the number of vessels entering dry dock and their tonnage, and the sum of the lengths of all vessels berthing at the Port in 2010.**

## **INTRODUCTION**

- 5.1. Use of wharves (t)**
- 5.2. Basins**
- 5.3. Pointed mooring**
- 5.4. Berths**
- 5.5. Area utilisation (t/day)**
- 5.6. Mechanical shore equipment.**
  - 5.6.1. Cranes**
- 5.7. Conveyor trucks**
- 5.8. Conveyor belts**
- 5.9. Mechanical shovels**
- 5.10. Railways shunting, locomotives**
- 5.11. Wagons**
- 5.12. Trucks**
- 5.13. Weighbridges**
- 5.14. Floating cranes**
- 5.15. Tugboats**
- 5.16. Slipways**
- 5.17. Description of terminals and wharfs**
- 5.18. Floating dock**
- 5.19. Barges**
- 5.20. Dry dock**

## 6.2. Brief description of the most important works

Order	PPEE	APB	Title
1	PBN1B2053E001	OB-GP-M-0401/2001	<p><b>RAISING THE AUTOTERMINAL ROAD SURFACE</b></p> <p>Access to the Inflammables wharf is currently via a rather winding road, as it has to follow the contours of the Autoterminal car leaseholding. To enable direct access and contribute to optimising vehicle traffic flow in the port precinct, the Port of Barcelona is currently working to raise the road surface of "3" Street over the Autoterminal. This project begins at the roundabout of port access gate 30, where it joins the ring road and continues along a straight road to the roundabout at the southern access to the Inflammables wharf, at gate 31, crossing part of the Autoterminal and Setram leaseholdings.</p> <p>The works required to build this new 800 m long road with its raised stretch have already been designed and defined. The buttresses of this stretch rest on reinforced earth walls above the leaseholding.</p> <p>The solution suggested consists of creating a raised crossing of approximately 380 m. The first 130 m will be built using a road between walls, the middle 100 m using a viaduct with 25 m spans between piles and the last 150 m consist of another road between walls. The transversal section measures 16 m (four 3.5 m lanes with 1 m hard shoulders). The highest point of the new road surface will be located approximately 10 m above the current height of the wharf, leaving a minimum vertical headroom of 5.30 m.</p>

Order	PPEE	APB	Title
2	PBN1A9066E001	OB-GP-M-0465/2004	<p><b>REBUILDING THE ALIGNMENT OF MODULE 1 OF THE ADOSSAT WHARF</b></p> <p>The area south of the Adossat wharf houses the pilots dock and a ro-ro ramp serving the surrounding terraces. These 500 and 600 m long terraces allow only one large vessel to berth at any time, causing the loss of a large stretch of berthing line and land areas, thereby reducing the efficiency of port operations.</p> <p>Around 45 m of the length of the current wharf need to be changed in order to provide this stretch with a single straight terrace, making it necessary to remove this ramp and to generate a new wharf to fill the pilots' dock. The new dock thus created will be approximately 1,200 m long and will allow the simultaneous berthing of cruisers and very long container vessels.</p> <p>This involves demolishing the ro-ro superstructure, extracting the surrounding rockpile, refloating the two caissons that make it up and mooring them in the port precinct.</p>
3	PBN1A3020E001	OB-GP-M-0517/2005	<p><b>BERTHING WHARF FOR BULK LIQUID CARRIERS ON THE INFLAMMABLES WHARF. NORTHWEST FACE</b></p> <p>It has been decided to build a new berth for bulk liquid carriers due to the increase in the handling of bulk liquids. This project will take shape on the northeast face of the Inflammables wharf with a berthing area used for transferring refined products between ship and land. The terminal will service ships between 180 and 275 m long.</p> <p>The berth comprises three structures: an operations platform, two mooring structures (similar to mooring dolphins) and a land access. The mooring structure and the berthing dolphins are built of caissons identical to those used in Prat wharf, Phase II. Two walkways are planned to allow people to walk between the operations platform and the mooring structures. The infrastructure works will be completed with the necessary equipment to allow ships to moor and berth.</p>
4	PBN1A3033E001	OB-GP-M-0550/2006	<p><b>FRONT APRON CONTRADIC WHARF - ERGRANSA</b></p> <p>The front part (apron or pierhead) of the Contradic wharf is 240 m long and comprises two different types of concrete structures. An initial stretch of 114 m, touching on the Contradic Nord wharf, is built of concrete blocks, with a cyclopean concrete superstructure with large stone blocks inside. The rest of the wharf, which is 126 m long, is made of reinforced concrete caissons (used in combination with steel rods for greater strength).</p> <p>The purpose of this project is to define the works to reform the stretch of wharf made of concrete blocks, and to perform the appropriate actions to build the front apron of the Contradic wharf.</p>
5	PBN1A3348E001	OB-GP-M-0598/2007	<p><b>REBUILDING THE PRAT WHARF</b></p> <p>The Prat wharf is the most important berthing infrastructure of the Port of Barcelona's South enlargement. The purpose of this rebuilding project is to rebuild the Prat wharf after the accident of January 2007. At that time, 16 of the 37 concrete caissons making up the new wharf line shifted 600 m from the wharf line due to liquefaction of the filling sand.</p> <p>The main problem facing the repair project involved knowing with any certainty whether it would be possible to refloat or demolish the caissons and to have a clear picture of the structural situation in the event of refloating, and also whether these caissons could be reused. In the end, almost all of the caissons can be recovered.</p>
6	PBN1C9019E001	OB-GP-P-0417/2001	<p><b>BORDER INSPECTION POST (BIP) BUILDING</b></p> <p>Border inspection posts (BIP) provide the necessary health guarantees for inspecting products for human and non-human consumption. The purpose of such inspections is to determine whether products meet the health conditions required by the EU. BIPs are located at access points for goods coming from outside the EU, such as ports, airports or geographical borders between the EU and third countries.</p> <p>The APB has a BIP on the Sud wharf - TCB Terminal, which came into service in 1994. In order to adapt the capacity to inspect food products to current and future goods traffic forecasts, the Port of Barcelona is currently constructing a new building to house the new BIP.</p> <p>This new facility will offer certain unique features appropriate to the performance of physical and documentary checks on foodstuffs coming into the Iberian peninsula by sea for distribution onto the market for consumption.</p> <p>The site chosen for the development and location of the new BIP facility is plot 22 of the Logistics Activities Area (ZAL Prat). The purpose of this building project is to define works for developing the inside of the plot, the BIP building and lorry park to accommodate waiting vehicles.</p>

Order	PPEE	APB	Title
7	PBN1A3021E001	OB-GP-P-0518/2005	<p><b>ENLARGEMENT OF THE RO-RO BERTHING WHARF ON THE COSTA WHARF</b></p> <p>As part of the enlargement of the existing berthing wharf on the Costa wharf, the purpose of this project is to define the elements required to build a ro-ro ramp at the intersection of the Costa wharf and Contradic Nord wharf of the Port of Barcelona to provide the necessary levels of reliability and operability in loading and unloading of wheeled goods. The infrastructure of the ramp comprises two reinforced concrete caissons measuring 21.94 m x 8.38 m x 11.50 m sunk at a depth of -12.00 m (refloated caissons from module 1 of the Adossat wharf), comprising 20 circular cells and 2 polygonal cells filled with recycled material and crowned with lean concrete.</p>
8	PBN1B2001E001	OB-GP-P-0542/2006	<p><b>PREPARATION OF THE RING ROAD (2010)</b></p> <p>Some stretches of the ring road support a higher flow of traffic than that defined in the rules as "T00", corresponding to the category of heavy traffic, defined by the number of vehicles on the road per day. This situation requires the road to be reinforced and rebuilt in the parts that are losing the capacity to bear heavy loads to avoid rapid and generalised degradation of the infrastructure. The work consists of reinforcing and rebuilding the surface along 46,000 m<sup>2</sup>, all along the ring road from the old Porta Coeli (Stretch I) up to the Inflammables area (Stretch VIII).</p>
9	PBN1A4014E001	OB-GP-P-0546/2006	<p><b>ENLARGEMENT OF THE ADOSSAT WHARF PHASE 2 B</b></p> <p>The works for this project come under the Port of Barcelona's Master Plan as part of the ongoing reorganisation of the container terminals. This project involves the creation of the infrastructure required for locating a new mixed container and general cargo terminal with a berthing line 1,035 m long and 16 m deep attached to the east seawall. The solution adopted is a wharf comprising 25 prefabricated reinforced concrete caissons resting on a banked foundation. 50-foot cranes are planned to operate in the terminal, although the wharf has been calculated to allow 100-foot cranes to operate there in future.</p>
10	PBN1A3028E001	OB-GP-P-0557/2006	<p><b>ENLARGEMENT OF THE SUD WHARF</b></p> <p>The enlargement of the Port of Barcelona's Sud wharf is required to increase the turning basin and ship manoeuvring area opposite the Enagas terminal. This project involves building a 623 m berthing wharf and a 18 Ha terrace. It also means demolishing the CLH (Compañía Logística de Hidrocarburos) jetty, thus improving manoeuvring capacity in the dock located between the Sud, Adossat and Inflammables wharves. This is the area in which boats currently turn, and the work concerned will help to increase the distances and draught in this dock. In addition, the berthing line will increase by 10% on the east face of the Sud wharf. The new area obtained by enlarging Sud wharf will make it possible to increase the capacity of the container terminal on this wharf from 1.3 to 2.1 million TEUs.</p>
11	PBN1A1003E001	OB-GP-P-0568/2007	<p><b>FITTING OUT A BERTHING LINE ON THE PRAT WHARF (South area)</b></p> <p>The Prat wharf terminal is currently being built, and once work is completed the wharf will have a new terrace covering 93 Ha. and a new 1,500 m berthing line. This wharf will house a container terminal, with a capacity of 2.5 million containers per year. The leaseholding company is Terminal Catalonia (TerCat), in which the Chinese group Hutchison Port Holding holds 70% and the Catalan Mestre group 30%. In addition to the intense import-export activity, particularly involving the railway, it will act as a hub port making it possible to concentrate and distribute containers to the ports in the foreland. The project includes the concrete superstructure over the caissons of the wall of the Prat wharf, the reinforced concrete tie beams over the caissons, the 150 Tn resistant bollards every 17 m and the berth defences every 17 m. The superstructure involves a series of elements and details that must allow TerCat to locate various types of equipment as necessary for the future operation of the terminal: manholes, electrical sockets, etc.</p>
12	PBN1A4043E001	OB-GP-P-0586/2007	<p><b>BUILDING OF A RESISTANT DRAINING LAYER ON THE PRAT WHARF. PHASE I (caissons 10-25)</b></p> <p>16 concrete caissons of the wall of Prat Wharf Phase slid out of place as a result of storm damage in January 2007. Since then, work has been carried out to fill and consolidate Phase II and Phase I (caissons 1 to 9). Meanwhile, great progress has been made in the works project called "Rebuilding the Prat Wharf" concerning Phase I (caissons 10 to 25). This action is part of the consolidation works underway in this area. The project involves building a horizontal drainage system to remove the water through vertical geodrains. This system consists of a layer of draining material 0.5 m. thick within two sheets of geotextile mesh, one above and the other below, with sumps and piping to collect and remove the water.</p>

Order	PPEE	APB	Title
13	PBN1G2359F001	OB-GP-P-0587/2007	<p><b>INSTALLATION OF GEODRAINS ON THE PRAT WHARF. PHASE I (caissons 10-25)</b></p> <p>The Prat wharf incident caused 16 caissons of the wharf wall of Phase I of the Prat wharf to shift. Since then, work has been carried out to complete the work to fill and consolidate Phase II and Phase I (*caissons 1 to 9). Furthermore, great progress has been made in the works project called "Rebuilding the Prat Wharf" concerning Phase I (caissons 10 to 25). This action is part of the consolidation works to be performed in the area associated to the project.</p> <p>Geodrains are being laid in the area of the terrace associated to caissons 10 to 25 of Prat wharf Phase I. These drains are used to speed up the consolidation process of a stratum that is not very permeable, so that the existing vertical drainage can be complemented by the horizontal or radial drainage created by these vertical drains, providing more directions for the flow of water and removing it more quickly. This is a way of achieving a sufficient degree of consolidation.</p>
14	PBN1A9057E001	OB-GP-P-0613/2008	<p><b>STRENGTHENING THE BLOCK WHARVES. BARCELONA WHARF. SOUTH ALIGNMENT. PHASE I</b></p> <p>Various inspections made on the Barcelona wharf (underwater inspections for the submerged part and geotechnical analyses), indicated that their blocks had been damaged and the material of the extrados had become weakened. This diagnosis can be seen even more clearly in the stretch corresponding to modules 1 and 2, showing settling of the surface and an important degree of shifting.</p> <p>The work consists of protecting modules 1 and 2 and the reinforcing both the extrados of the area corresponding to these modules and the bollards along the wharf alignment.</p>
15	PBN1A9059E001	OB-GP-P-0615/2008	<p><b>ACCESS CHANNEL ON THE BULK LIQUID CARRIERS BERTHING WHARF</b></p> <p>As part of the enlargement process underway at the Port of Barcelona in the "Delta Area", new platforms are to be built to moor bulk liquid carriers on east side of the Inflammables wharf. Before this area can be made operational, the current piping channel in Port of Alexandria Street must be joined to the first mooring platform to be built. This will allow the new leaseholders setting up in this sector to transport bulk liquids from the mooring platform to the channel.</p> <p>This project consists of defining, justifying and evaluating the actions required to build a channel for berthing bulk liquid carriers on the east side of the Inflammables wharf of the Port of Barcelona.</p>
16	PBN1A9062E001	OB-GP-P-0624/2008	<p><b>FITTING OUT THE WALKWAY IN PASSENGER TERMINAL "C"</b></p> <p>The work involves building a fixed walkway to Terminal C to allow passengers to embark and disembark, and the module connecting the terminal and the walkway. This module will be located in the area next to the southwest facade of the terminal, in a rectangle comprising a walkway 21 m from this facade and its perpendicular 34 m from the corner with the northeast facade</p> <p>The walkway will be located in the area next to the northwest facade of Terminal C within a rectangle 6.64 m. wide and 213.12 m. long.</p>
17	PBN1A3004E001	OB-GP-P-0630/2008	<p><b>SOUTHWARD ENLARGEMENT OF THE TERRACE PRAT TERMINAL</b></p> <p>This project emerged as a result of the latest agreements reached between Barcelona Port Authority and Terminal Catalunya, in the process that ended with the modification of the leaseholding of the Prat Terminal, as approved in the APB Management Board meeting held on 17 December 2008. The total area of the terminal will thus increase from 93 to 100 Ha. This additional space will be achieved by enlarging the area under lease to the south of the Prat wharf. Specifically, the manoeuvring and storage area will be extended by a 50 m strip and by 75 m in the area behind this.</p> <p>It is worth pointing out that the enlarged area for filling had already been regained from the sea as part of the hydraulic filling activity during previous works projects.</p> <p>The project involves removing (loading, transport, tipping and spreading) the materials pre-loaded into the terrace corresponding to the southward enlargement of the Prat wharf.</p>
18	PBN1BA3005E001	OB-GP-P-0631/2008	<p><b>DEVELOPMENT of "100" STREET</b></p> <p>The leaseholder is due to begin operating the Prat wharf at the end of 2010. Prior to this, new land accesses need to be built to the terminal and entry control points defined to restrict access to the port precinct. Likewise, the new terminal must be connected to the existing rail network in the Port of Barcelona using the International Rail Gauge.</p> <p>The absence of appropriately sized facilities could lead to serious congestion in and around the future container terminal on the Prat Wharf.</p> <p>This will involve building "100" Street to its final width of 36 m, from its intersection with "114" Street to the start of the ramps of the future southern intersection of the Prat lane, including connections with existing lanes and industrial areas.</p> <p>The project will also resolve interferences with existing installations, the definition of the new networks and sizing of the drainage network required for removing rain water from the respective road surfaces within this project area.</p>

Order	PPEE	APB	Title
19	PBN1A2035E001	OB-GP-P-0646/2009	<p><b>IMPROVING THE EAST SEAWALL. PHASE I (Reinforcing Paseo Gabriel Roca)</b></p> <p>This consists of demolishing the road surface, pavement and wall in Paseo Gabriel Roca and building a new superstructure crowned at +11.20 with a clear width of 5.20 m at a height of +10.00.</p> <p>It also includes the occasional installation of breakwaters in the higher area where necessary. It will be connected to the existing boulevard with a ramp 5.20 m wide and 40 m long.</p>
20	PBN1A2036E001	OB-GP-P-0647/2009	<p><b>COSTA WHARF RAILWAY LINE</b></p> <p>This works project responds to the need to improve goods transport and is part of the group of actions planned in the Port of Barcelona's Costa wharf. It involves:</p> <ul style="list-style-type: none"> <li>- Widening the Costa wharf, with works already underway.</li> <li>- Extending the functional operation of goods rail transport within the traffics of the Port area to improve performance of the various rail terminals and increase the capacity of the rail network.</li> </ul> <p>The works involve adapting the Port of Barcelona's Costa wharf railway line so that it can be used by a logistics operator for loading and unloading composite trains transporting cars and transporting these cars to the Costa wharf using a system that is totally separate from the other traffics in the Port. The project involves building a siding in the Costa wharf and a bridge above the Port of Barcelona's ring road. The new line will have both Iberian and metric gauge and will be 530 m long.</p>
21	PBN1B3010E001	OB-GP-P-0650/2009	<p><b>UIC GAUGE ACCESS IN THE CONTAINER TERMINAL OF THE PRÍNCIP D'ESPANYA WHARF</b></p> <p>The enlargement of the Port of Barcelona's hinterland necessarily involves fostering use of the railway. The container terminals must have UIC gauge to provide access to the French market by rail.</p> <p>The aim of this action is to complete adaptation of the Port of Barcelona's rail infrastructure to provide access to composite trains coming from the Can Tunis terminal travelling on UIC gauge to the container terminal on Príncipe d' Espanya wharf from the current access to the rail loop.</p>
22	PBN1A4386G001	OB-GP-P-0655/2009	<p><b>COMPLEMENTARY ENLARGEMENT ADOSSAT WHARF. PHASE 2 B</b></p> <p>The APB has reached an agreement with the Maritime Civil Guard to locate a permanent base of this police force south of the enlargement of Adossat wharf Phase 2 B. This base involves creating a new dock to shelter the terrace and berthing points for the vessels of the Maritime Civil Guard.</p> <p>This complementary project will entail the following actions:</p> <ul style="list-style-type: none"> <li>- Managing and recycling the material excavated from the rubble to be withdrawn from the main works project. This will involve grinding the rubble to a maximum uniform size and removing any surplus steel rods. This process provides a series of clearly recovered products that can be used in various maritime works projects such as building terraces and filling and building embankments.</li> <li>- Building the sheltering infrastructure for the Maritime Civil Guard berthing area. This involves creating a small sheltered water dock measuring 120 x 100 m to be generated by building an L-shaped embankment emerging from the East seawall 120 m south of the embankment closing the enlargement of the Adossat wharf.</li> </ul>
23	PBN1A9578E001	OB-GP-P-0672/2010	<p><b>ENLARGEMENT OF THE RAIL TERMINAL ON THE SUD WHARF. PHASE I</b></p> <p>The growing demand for services from Terminal de Contenedores de Barcelona (TCB), the planned fostering of goods transport by rail to ease congestion in the accesses to the Port of Barcelona and the new UIC gauge rail connection with France, which will come on stream late in 2010, require at least one mixed gauge line (International gauge of 1,435 mm and Iberian gauge of 1,668 mm) in the TCB's rail terminal, to come on stream before the year's end.</p> <p>This project defines all the works required for bringing a mixed (International and Iberian) gauge line into service. It is also important to guarantee future compatibility in terms of functionality and layout of any future enlargement to six mixed gauge lines. The aim is to achieve a higher capacity rail terminal meeting the European commission's interoperability standards.</p>
